

Proc. Soc. Nutr. Physiol. (2004) 13

## Contents

	<b>Page</b>
<b>Review lecture</b>	
<b>Genome analysis and performance traits in cattle</b>	13-21
T. Leeb - Tierärztliche Hochschule Hannover, Institut für Tierzucht und Vererbungs- forschung, Bünteweg 17p, D-30559 Hannover	
<b>Minerals and traceelements</b>	
<b>1. Effects of different phosphorus sources in the diet on phosphorus content in blood and on bone stability (breaking strength) in broiler chicks</b>	23
A. Hemme, M. Spark, H. Paschertz and J. Kamphues – Hannover	
<b>2. Alteration of regulative P-excretions from urine to faeces by growing Saanen goat kids, fed either with a solid or a liquid diet</b>	24
May Loeff, Korinna Huber, Julia Hattendorf, G. Breves, E. Pfeffer – Bonn/Hannover	
<b>3. Effects of different phosphorus supply on the PTH and vitamin D3 receptor expression in small ruminants</b>	25
Alexandra Muscher, Julia Hattendorf, Korinna Huber, E. Pfeffer, G. Breves - Hannover/Bonn	
<b>4. Changes in bone markers and intact parathyroid hormone in Hanoverian Warmblood foals</b>	26
Ingrid Vervuert, M. Coenen, Sarah Winkelsett, L. Christmann, O. Distl, E. Bruns and B. Hertsch - Hannover/Göttingen/Verden/Berlin	
<b>5. The effect of inorganic and organic copper and zinc supplementation on growth performance and copper and zinc status of weanling pigs</b>	27
C. Rapp, D. Büttner, U. Geier, A. Oster and H. Schenkel - Eden Prairie/ Forchheim/Stuttgart-Hohenheim	
<b>6. Selenate reduces insulin resistance in type II diabetic dbdb mice whereas selenite has no effect</b>	28
A.S. Müller and J. Pallauf – Giessen	
<b>7. Effects of dietary phytase activity on inorganic phosphorus concentration in blood plasma of Nile Tilapia - <i>Oreochromis niloticus</i> fed low phosphorus plant based diets</b>	29
L. Portz and F. Liebert – Göttingen	
<b>8. Effect of different sources of microbial phytase on parameters of phytate degradation in the digestive tract of Nile Tilapia - <i>Oreochromis niloticus</i></b>	30
L. Portz and F. Liebert - Göttingen	
<b>9. Inevitable phosphorus losses of laying hens</b>	31
R. Hempel, E. Strobel and M. Rodehutsord - Halle (Saale)	
<b>10. Influence of low copper and different manganese contents in milk replacers on performance of calves, concentration of these elements in the liver and Cu-retention</b>	32
M. Spolders, U. Meyer, G. Flachowsky, M. Grün – Braunschweig/Jena	

11.	<b>The efficiency of different selenium compounds on the repletion of the activity of functional selenoproteins and selenium content in the liver of selenium depleted rats</b>	33
	Claudia Parys and J. Pallauf - Giessen	
12.	<b>Effects of dietary manganese concentration on growth, manganese concentration in organs and cartilage composition of piglets</b>	34
	C. Dreisbach, J. Pallauf and Erika Most - Giessen	
13.	<b>Reduction in feed mineral content – Effects on piglet development and mineral excretion</b>	35
	Mechthild Freitag, Franca Berardi – Soest	

## **Aminoacids and nitrogen**

14.	<b>Influence of the Ruminant Nitrogen-Balance (RNB) on rumen fermentation, microbial protein synthesis, amount of utilisable crude protein and milk urea</b>	36
	Andrea Riemeier, P. Lebzien, G. Flachowsky-Braunschweig	
15.	<b>Standardization of the gut segment to be sampled in studies on precaecal amino acid digestibility in broiler chickens</b>	37
	H. Kluth and M. Rodehutschord - Halle (Saale)	
16.	<b>Marginal efficiency of methionine utilisation in broiler chicks depending on the supply of methionine and non essential amino acid nitrogen</b>	38
	A. A. Fatufe and M. Rodehutschord - Halle (Saale)	
17.	<b>Influence of the dietary tryptophan concentration on performance of lactating sows and the growth of their piglets</b>	39
	F.G. Pampuch, Brigitte R. Paulicks and Dora A. Roth-Maier – Freising-Weihenstephan	
18.	<b>Bioavailability of lysine in shrimp meal determined by the slope-ratio assay in pigs</b>	40
	A. O. Fanimu and A. Susenbeth - Abeokuta/Kiel	
19.	<b>Long-term effects of a high dietary protein intake on protein metabolism in [<sup>15</sup>N]-labeled rats as animal model</b>	41
	A. Vikari, W. Windisch and F. X. Roth – Freising-Weihenstephan/Wien	
20.	<b>Influence of variety and location on the crude protein content and amino acid composition of grain legumes</b>	42
	Annette Simon and W. Köhn -Berlin	
21.	<b>Plasma Amino Acid Levels in Horses under the Influence of Digestion and Exercise</b>	43
	Sigrun Hackl, J. Zentek, R.v.d.Hoven, J. Spona, Michaela Zickl – Wien	
22.	<b>Influence of dietary protein quality and quantity on urine composition of cats</b>	44
	J. Zentek, Annette Schulz –Hannover/Wien	
23.	<b>Effect of the ratio ammonia to short chain fatty acids in the rumen on microbial protein synthesis in lactating dairy cows</b>	45
	T. Kaswari and P. Lebzien – Braunschweig	
24.	<b>Effect of varying ruminal N-balance on feed intake and milk yield of dairy cows</b>	46
	V. Kriete, U. Meyer, P. Lebzien and F. Liebert - Braunschweig/Göttingen	
25.	<b>Lysine requirement in adult miniature pigs assessed by an indicator amino acid oxidation method</b>	47
	U. Hennig, Gunda Backes, K. J. Petzke, Angelika Elsner, P. Junghans, M. Derno, G. Nürnberg, Cornelia C. Metges – Dummerstorf/Bergholz-Rehbrücke	

26.	<b>Effect of the true ileal digestible threonine supply on performance of grower and finisher pigs</b>	48
	T. Ettle, Dora A. Roth-Maier, J. Bartelt and F.X. Roth - Freising-Weihenstephan/Cuxhaven	
27.	<b>Conclusions about the optimal lysine:threonine ratio for growing pigs, based on requirement studies</b>	49
	B. Wesseling and F. Liebert – Göttingen	
28.	<b>Selected parameters of protein and serotonin metabolism in milk and blood of lactating sows in response to the dietary tryptophan supply</b>	50
	Brigitte R. Paulicks, F.G. Pampuch and Dora A. Roth-Maier – Freising-Weihenstephan	
29.	<b>Apparent ileal and total amino acids digestibility and nitrogen balance in young chickens fed diets with different protein level</b>	51
	T. Wertelecki, D. Jamroz - Wrocław	
30.	<b>Disappearance of amino acids from yolk sac of chickens fed diets with different protein level</b>	52
	T. Wertelecki, D. Jamroz - Wrocław	
31.	<b>Estimation of the potential for protein deposition of extensive genotypes of growing chicken in different age periods</b>	53
	Samadi , F. Liebert and A. Sünder - Göttingen	
32.	<b>First conclusions about threonine requirement of male growing chicken of extensive genotype depending on age and protein deposition</b>	54
	Samadi and F. Liebert-Göttingen	
33.	<b>Effect of DL-Methionine supplementation on various fattening and slaughter traits of broilers under organic farming conditions</b>	55
	A. Lemme, K. Damme, A. Petri - Hanau/Kitzingen	
34.	<b>Variability of lysine efficiency of diets for Nile-Tilapia (<i>Oreochromis niloticus</i>) containing different batches of peas</b>	56
	K. Benkendorff and F. Liebert - Göttingen	
35.	<b>Comparison of NRC and GfE amino acid recommendations in diets for broilers on growth and slaughter performance</b>	57
	R. Leitgeb, F. Hutterer, J. Bartelt, Nanda Zeh, F. Ertl and Christine Iben – Wien/Cuxhaven	

## Transport- and epithelial physiology

36.	<b>Effects of chloride and sulfate ions on the surface pH of rumen epithelium</b>	58
	Sabine Leonhard-Marek, B. Schröder and R. Busche - Hannover	
37.	<b>Effects of IGF-1 on Na<sup>+</sup> transport across rumen epithelium and on Na<sup>+</sup>/H<sup>+</sup> exchanger</b>	59
	Zanming Shen, H. Martens and Monika Schweigel – Nanjing/Berlin	
38.	<b>Functional and molecular characterisation of the vacuolar H<sup>+</sup>-ATPase in sheep rumen epithelial cells</b>	60
	Monika Schweigel, Elisabeth Froschauer, B. Etschmann and H. Martens – Berlin/Wien	
39.	<b>Effects of short chain fatty acids on nerve mediated ruminal motility in vitro</b>	61
	Helga Pfannkuche and G. Gäbel - Leipzig	
40.	<b>Functional and structural parameters of Ca absorption from pig jejunum as affected by vitamin D<sub>3</sub></b>	62
	M. Brandenburger, K. Huber and B. Schröder - Hannover	
41.	<b>Catabolic pathways of histamine in the porcine proximal colon</b>	63
	Vivica von Vietinghoff, G. Gäbel and J.R. Aschenbach – Leipzig	

42. **Influence of dietary protein source on metabolism of nucleic acids and alkaline phosphatase activity in the small intestinal mucosa of preruminant goats** 64  
Ulrike Schönhusen, R. Žitňan, S. Kuhla, Korinna Huber, G. Breves, R. Pabst and J. Voigt - Dummerstorf/Košice/Hannover
43. **Could dietary protein source influence the expression of nutrient and electrolyte transport in the small intestines of preruminant goats?** 65  
Korinna Huber, Ulrike Schönhusen, S. Kuhla, R. Žitňan, J. Voigt and G. Breves – Hannover/ Dummerstorf/ Nitra

## Fat and lipids

44. **Long-chain polyunsaturated fatty acids in milk produced in lowland and alpine systems** 66  
F. Leiber, M. Kreuzer, D. Nigg, H.-R. Wettstein and M.R.L. Scheeder – Zurich
45. **Effects of different isomer ratios and dose-response relationship of CLA in finishing pigs** 67  
M.R.L. Scheeder D. Schwörer, C. Wenk and Angelika M. Pfeiffer – Zürich/ Sempach/Offenbach
46. **The effect of dietary conjugated linoleic acids on the metabolism of  $\alpha$ -linolenic acid and the formation of eicosanoids in rats** 68  
K. Eder, Nadine Slomma and Karin Becker – Halle (Saale)
47. **Gene expression profile in the liver of rats fed diets with an oxidized fat and various concentrations of vitamin E** 69  
K. Eder, Andrea Sülzle and F. Hirche – Halle (Saale)
48. **Effects of long chain  $\omega$ 3 fatty acid supplementation on fatty acid profiles and lung function in horses affected with RAO (Recurrent Airway Obstruction)** 70  
A. Parisini, J. Zentek, R. van den Hoven, H.W. Hulan – Vienna/New Foundland
49. **Performance, carcass quality and fatty acid composition of trout (*Salmo gairdnerii*) as affected by dietary conjugated linoleic acid and vitamin E supplementation** 71  
Wiebke Schabbel, D. Maaß, H. Steinhart, R. Reiter and F.J. Schwarz – Hamburg/ Starnberg/Freising-Weihenstephan
50. **Comparison of CLA methyl esters and sunflower seeds in their effects on milk fat content and fatty acid profile in cows** 72  
Frigga Dohme, M. Collomb and G. Bee – Posieux/Bern

## Digestion

51. **Influence of the dietary fat content on the oral bioavailability of quercetin-3-O-glucoside and quercetin in pigs** 73  
R. Cermak, Stephanie Lesser and S. Wolfram - Kiel
52. **Effect of dietary sodium bicarbonate supplementation on the toxicokinetics of ochratoxin A and B in pigs** 74  
R. Blank, S. Wolfram – Kiel
53. **Fiber-related digestive processes in modern crossbreed pigs and old pig breeds** 75  
Elke Meister, H. Öztürk, G. Breves, Hj. Abel – Göttingen/Hannover
54. **Influence of particle size of grass silage fed as TMR on chewing activity and rumen fermentation on high-yielding dairy cows** 76  
M. Tafaj, Q. Zebeli, B. Junck and W. Drochner – Stuttgart-Hohenheim

55.	<b>Ruminal nutrient degradation of untreated and chemically treated wheat grain</b> K.-H. Südekum, Maike Klein, Monika Paschke-Beese, O. Schade - Kiel/ Rendsburg	77
56.	<b>Comparison of methods to predict supply of ketogenic and glycogenic precursors from starch in dairy cows</b> A.M. van Vuuren, V.A. Hindle and J.W. Cone - Lelystad	78
57.	<b>Effect of level of feed intake and of a <i>Fusarium</i> contaminated wheat on rumen fermentation in cows</b> Karen Matthäus, S. Dänicke, P. Lebzien, Hana Valenta, K. H. Ueberschär and G. Flachowsky - Braunschweig	79
58.	<b>Praecaecal amino acid digestibility of field beans in broilers</b> Annette Simon - Berlin	80
59.	<b>Genetic profiles of rumen microbial communities: A cultivation independent technique to study the effect of feeding</b> E. Strobel, J. Wesolowski, G. Flachowsky and C. C. Tebbe - Braunschweig	81
60.	<b>Effects of Brown Midrib 3 Mutation in Silage Corn on Ruminal Degradability, Digestibility and Performance of Beef Cattle</b> H. Kurtz, Friederike Flaßhoff and F.J. Schwarz – Freising-Weihenstephan	82
61.	<b>Influence of grass silage particle size fed as TMR on the <i>in vitro</i> digestive characteristics of rumen digesta in dairy cows</b> Q. Zebeli, M. Tafaj, B. Junck and W. Drochner – Stuttgart-Hohenheim	83
62.	<b>Comparison of grass and lucerne silages in situ degradability in the rumen of dairy cows.</b> Vivian Ariyo, P. Lebzien, U.ter Meulen and G. Flachowsky - Braunschweig/ Göttingen	84
63.	<b>Influence of a linseed oil supplementation at different concentrate/roughage ratios on some rumen parameters in lactating dairy cows</b> Kristin Erdmann, P. Lebzien and G. Flachowsky - Braunschweig	85
64.	<b>Composition of unextracted and extracted <i>Moringa oleifera</i> leaves and their effects on <i>in vitro</i> rumen fermentation</b> Carla R. Soliva, M. Kreuzer, N. Foidl, G. Foidl, Andrea Machmüller and H.D. Hess – Zurich/Caslano	86
65.	<b>Accounting for marker detachment in studies of particulate passage through the gastrointestinal tract – a mathematical approach</b> Eva Schlecht, H. Richter – Stuttgart-Hohenheim	87
66.	<b>Digestion studies in captive Indian rhinoceroses (<i>Rhinoceros unicornis</i>)</b> M. Clauss , Ellen Kienzle, Carmen Polster, H. Wiesner, Katrin Baumgartner, Friedericke von Houwald, Ellen Dierenfeld – München/Nürnberg/Basel/ New York	88
67.	<b>Dose response of selected carbohydrate-rich feed additives to chyme fermentation in vitro</b> Eva Bauer, Barbara A. Williams, Christina Voigt, R. Mosenthin and M.W.A. Verstegen – Stuttgart-Hohenheim/Wageningen	89
68.	<b>Comparison of caecal chyme and faeces of pigs as inoculum for the fermentation of hay, oat bran and gelatine with the modified Hohenheim gas test</b> B. Zacharias, Dagmar Duda, B. Buske, M. Tafaj, H.-P. Piepho, W. Drochner – Stuttgart-Hohenheim	90

69.	<b>Investigations on the effects of splitting meals and/or enzyme doses in pancreatic duct ligated pigs on nutrient digestibility</b> Kirsten Stemme, Elisabeth Kammlott, Jeannine Karthoff, P. C. Gregory, J. Kamphues - Hannover	91
70.	<b>Effects of feeding different types of carbohydrates (cellulose, pectin, starch and fructans) on breath hydrogen and methane responses in healthy horses</b> Anne Mößeler, Ingrid Vervuert and M. Coenen - Hannover	92
71.	<b>Comparison of total faecal collection (standard method) and the indicator method with 4 N HCl insoluble ash to determine the digestibility of proximate nutrients in horses</b> Annette Zeyner, R. Fuchs, Helga Kaske and M. Hoffmann – Leipzig	93
72.	<b>Fructans in horse nutrition: Occurrence in pasture grasses and fermentation kinetics</b> Ingrid Vervuert, M. Coenen, Sandra Dahlhoff, Sophie Plumhoff and W. Sommer - Hannover/Münster	94
73.	<b>The use of near-infrared reflectance spectroscopy to predict the protein, fat and gross energy contents of broiler excreta</b> Petra Philipps, Raffaella Aureli, B. Cochin de Billy, Anna-Maria Klünter - Village-Neuf	95

## **Metabolism, growth, lactation**

74.	<b>Studies with alfalfa silage as a forage source for high yielding dairy cows</b> M. Bulang, J. Boguhn, T. Engelhard, H. Kluth and M. Rodehutschord - Halle (Saale)/Iden	96
75.	<b>Recovery of <sup>13</sup>C in breath CO<sub>2</sub> of young bulls (German Holstein x Charolais) after a bolus dose of NaH<sup>13</sup>CO<sub>3</sub></b> P. Junghans, J. Voigt, W. Jentsch, Cornelia C. Metges and M. Derno - Dummerstorf	97
76.	<b>Impact of iron status on antioxidant status of newborn animals</b> M. Stohrer, S. Porzig, J. Schwarzer, W. Rambeck, M. Stangassinger - München	98
77.	<b>Comparison of different protein feedstuffs for growing-fattening turkeys</b> S. Hintenaus, Christine Iben, W. Zollitsch - Vienna	99
78.	<b>Influence of high altitude on bone metabolism of growing sheep</b> Annette Liesegang, D. Hüttenmoser, F. Leiber and H. Leuenberger - Zurich/ Hünenberg	100
79.	<b>Effects of a gradual replacement of grain by dried sugar beet pulp in calve diets on feed intake, digestion, apparent fermentation in the forestomach, N-containing fractions in the duodenal fluid and body weight gain</b> E. Boldt, T. Hanna and M. Hoffmann - Leipzig	101
80.	<b>Recording of metabolic parameters during the first twelve weeks post partum in dairy cows Interrelationships with milk yield, body condition and age</b> Sabrina Hachenberg, Claudia Weinkauff, Stephanie Hiss, Ute Müller, H. Spiekers and Helga Sauerwein - Bonn	102
81.	<b>Interindividual and intraindividual variation of feed intake in fresh cows</b> Karen Horstmann, Sabine Seggewiß, J. Rehage, U. Meyer, G. Flachowsky and M. Kaske – Hannover/Braunschweig	103
82.	<b>Milk composition in fresh cows: the influence of energy balance and week of lactation</b> Sabine Seggewiß, Karen Horstmann, J. Rehage, U. Meyer, G. Flachowsky and M. Kaske – Hannover/Braunschweig	104

83. **Investigations on water intake of fattening bulls** 105  
Wiebke Stahl, U. Meyer and G. Flachowsky – Braunschweig
84. **Influence of various anionic salts on rumen fermentation, blood and urine parameters and their possible relevance in the prevention of milkfever** 106  
Meike Engel, S. Frömer, Leonie Löffler - Berlin

## Energetics

85. **Methane emission of dairy cows fed easily and hardly fermentable roughages with and without concentrate** 107  
Ida K. Hindrichsen, H.-R. Wettstein, Andrea Machmüller and M. Kreuzer - Zurich
86. **Evaluation of daily requirement of ME for fattening lambs of the genotype German Merino landsheep using different ME systems** 108  
G. Bellof and J. Pallauf – Freising-Weihenstephan/Giessen
87. **Prediction of energy digestibility based on total dietary fiber in complete dry food for dogs and cats** 109  
Ellen Kienzle, V. Biourge, Alexandra Schönmeier – Munich/Aimargues

## Free topics

88. **Investigations on effects of high doses of vitamin K<sub>3</sub> in complete diets for small parrots (*Agapornis spp.*)** 110  
Petra Wolf, Carolin Hupfeld, G. Dorrestein und J. Kamphues - Hannover/Utrecht
89. **Influence of phytoestrogens, polyunsaturated fatty acids, vitamin D and K on bone metabolism: investigations on intact and ovariectomized beagle dogs** 111  
U. Wehr, Susanne Kern and W. A. Rambeck - München
90. **Influence of ensiling on the DNA-degradation in isogenic and transgenic corn** 112  
Karen Aulrich G. Pahlow and G. Flachowsky - Trenthorst/Braunschweig
91. **Gene chip analysis reveals  $\alpha$ -tocopherol sensitive gene in rat liver** 113  
G. Rimbach and Elisabeth Stöcklin – Kiel/Basel
92. **The rhythm of melatonin in cattle milk and the possible role of “night milk” as “functional food”** 114  
Anna-Caroline Wöhr, J. Birkle, J. Unshelm and M. H. Erhard – München
93. **Investigations on nutritional factors related to the Bavarian BSE epidemic** 115  
M. Clauss, Ellen Kienzle – München
94. **Investigations concerning the effect of glyphosate residues in feed on rumen fermentation parameters and *in sacco* dry matter degradation** 116  
Liane Hüther, Svenja Drebes and P. Lebzien – Braunschweig
95. **Effect of feeding ergot on piglets and chickens** 117  
Simone Mainka, S. Dänicke, S. Matthes, H. Böhme, G. Flachowsky - Braunschweig/Celle
96. **Effects of chlorinated paraffins on performance of laying hens and on carry over** 118  
K.-H. Ueberschär and S. Matthes - Celle
97. **Faba Beans (*Vicia Faba L.*) with Reduced Pyrimidine Glucosides as a Feed Component for Broiler Breeders** 119

	B. Lenz, Martina Gerken, Hj. Abel - Göttingen	
98.	<b>Bioavailability of nonpurified acrylamide from a heated potato product – a pilot study with Japanese quails</b>	120
	D. Ranz , M. Jezussek, Claudia Thielen, P. Schieberle, Ellen Kienzle – München/Garching	
99.	<b>Effects of dry matter content and pH-value on the development of clostridia in silages</b>	121
	Ehregard Kaiser, Kirsten Weiß and Polip Iv - Berlin	
100.	<b>The anti-oxidative state before and after a diagnosed abomasal displacement (DA) in cows</b>	122
	M. Fürll, M.N. Dabbagh, H. Kirbach, C. Nauruschat, T. Sattler, H. Wilken – Leipzig/Hama (Syrien)	
101.	<b>The influence of light physical activity on postprandial lipemia in healthy but not endurance trained young people</b>	123
	Martina Pfeiffer, Lida Brich, C. Wenk and P. C. Colombani - Zürich	
102.	<b>Four generations feeding of GMO-corn to breeder quails</b>	124
	Ingrid Halle, Karen Aulrich and Gerhard Flachowsky - Braunschweig	

## Additives

103.	<b>Effect of organic acids on dietary self-selection by the piglet</b>	125
	T. Etle, K. Mentschel and F.X. Roth – Freising-Weihenstephan	
104.	<b>The effect of gluconic acid on growth and intestinal microflora of weanling pigs</b>	126
	G. Biagi, E. Vezzali, A. Piva and F.X. Roth – Bologna/Freising-Weihenstephan	
105.	<b>Effect of Echinacea purpurea L. (MOENCH) on performance and immune status in pigs</b>	127
	Barbara M. Böhmer, Brigitte R. Paulicks, Dora A Roth-Maier – Freising-Weihenstephan	
106.	<b>PEG does not fully prevent the formation of tannin-protein complexes <i>in vitro</i></b>	128
	S. Muetzel, K. Becker – Stuttgart-Hohenheim	
107.	<b>Effects of supplemented probiotic Lactobacillus acidophilus strain on digestive parameters and health status in German Shorthair Pointers</b>	129
	M. Pascher, J. Zentek – Wien	
108.	<b>Impact of a probiotic <i>Enterococcus faecium</i> preparation on animal performance and selected microbial pathogenicity markers in piglets</b>	130
	D. Taras, M. Macha, W. Vahjen, O. Simon - Berlin	
109.	<b>Influence of <i>Enterococcus faecium</i> on the immune system of sows and piglets</b>	131
	Lydia Scharek, Barbeline Altherr, M.F.G. Schmidt - Berlin	
110.	<b><i>Bacillus cereus</i> as a probiotic supplement - Effects on absorption and secretion in pig jejunum</b>	132
	Ulrike Lodemann, Anke Finnah, Barbara Lorenz, H. Martens - Berlin	
111.	<b>Modification of intestinal bacterial communities by a probiotic <i>Enterococcus faecium</i> strain in piglets</b>	133
	W. Vahjen, D. Taras, M. Macha, O. Simon – Berlin	
112.	<b>Molecular analysis of the effects of probiotics on bacterial pathogens in swine</b>	134
	P. Schierack, M. Nordhoff, Marion Pollmann, P. Schwerk, Christiane Tölke, K. Tedin und L.H. Wieler - Berlin	

113.	<b>Influence of an <i>Enterococcus faecium</i> probiotic on the alkaline phosphatase activity of the small intestine in piglets</b>	135
	B. Seelig, K. D. Weyrauch, W. Vahjen, Barbara Drewes and M. Rieß - Berlin	
114.	<b>Performance, ileal digestibility of nutrients, amino acids and microbial status of large intestine in broiler fed diets with increased yellow lupine content and carbohydrases supplement</b>	136
	D. Jamroz, J. Orda, A. Wiliczekiewicz, T. Wertelecki, J. Skorupińska - Wrocław	
115.	<b>Influence of inulin on total bacteria and bifidobacteria in the intestine of growing pigs as determined by <i>Fluorescent In Situ Hybridization</i></b>	137
	G. Loh, M. Eberhard, R. M. Brunner, U. Hennig, M. Kwella, C.C. Metges – Dummerstorf	
116.	<b>Investigation on the precaecal and faecal digestibility of lactulose and inulin and influence of these substances on nutrient digestibility and microbial characteristics</b>	138
	Gertraud R. Branner, Barbara M. Böhmer and Dora A. Roth-Maier – Freising-Weißenstephan	
117.	<b>Effect of drying procedure on a tannin bioassay and it's relation to various chemical tannin assays</b>	139
	S. Muetzel, K. Becker – Stuttgart-Hohenheim	
118.	<b>Drying procedure does not affect the extractability and activity of tannins</b>	140
	S. Muetzel, K. Becker – Stuttgart-Hohenheim	
119.	<b>Effects of a feed additive enriched with nucleotides on faecal microbiota of calves</b>	141
	Brigitta Kleessen, H. Fuhrmann and Monika Krueger – Leipzig	
120.	<b>Influence of Living and Autoclaved Yeast Cultures (Yea-Sacc®) on in vitro Ruminant Microbial Metabolism</b>	142
	H. Öztürk, Anke Werner and G. Breves – Ankara/Hannover	
121.	<b>Yeasts as a substitute of soy bean protein in complete diets for weaner piglets: Investigations of N-metabolism</b>	143
	M. Spark, H. Paschertz and J. Kamphues – Hannover	
122.	<b>Investigations the probiotic effects of Escherichia coli strain Nissle 1917 after oral infection with Salmonella Enteritidis in chickens</b>	144
	I. Mohamed, W. Schrödl, H. Hafez and M. Krüger - Leipzig/Berlin	
123.	<b>Influence of different dietary Zn additives on intestinal parameters and zinc metabolism in piglets</b>	145
	Elisabeth Wagner, E. Razzazi, Martina Pascher, J. Zentek - Vienna/Austria	
124.	<b>Thermostability and activity of a phytase added to a broiler diet</b>	146
	Ruth Messikommer und C. Wenk - Zürich	
125.	<b>Effects of Savoury, <i>Nigella sativa</i> L. and Cacao husks on growth and carcass composition of broiler chickens</b>	147
	Ingrid Halle and R. Thomann – Braunschweig/Berholz-Rehbrücke	

## **Workshop I: Ernährung, Stoffwechsel und Krankheitsanfälligkeit der Hochleistungskuh**

W1.	<b>Zur Fütterung von Hochleistungskühen</b>	151-154
	G. Flachowsky, P. Lebzien und U. Meyer - Braunschweig	

<b>W2.</b>	<b>Adaptation and regulation of epithelial functions in the gastrointestinal tract</b> G. Gäbel, S. Wolffram - Leipzig/Kiel	155-161
<b>W3.</b>	<b>The molecular basis of lactation - metabolism in liver cells</b> M. Stangassinger and H.P. Sallmann - München/Hannover	162-171
<b>W4.</b>	<b>Metabolic Performances of the Mammary Gland</b> J. W. Blum - Bern	172-176
<b>W5.</b>	<b>Interactions between milk yield and production diseases in dairy cows</b> J. Rehage and M. Kaske – Hannover	177-182

## **Workshop II: Ernährung der Milchkühe im organischen Landbau**

<b>W6.</b>	<b>Milchviehfütterung unter systemorientierten Gesichtspunkten in der Ökologischen Landwirtschaft</b> A. Sundrum und U. Schumacher - Kassel/Bielefeld	183-184
<b>W7.</b>	<b>Fütterungscontrolling in ökologisch wirtschaftenden Milchviehbetrieben in Nordrhein-Westfalen</b> C. Drerup, K. Kempkens – Wiedenbrück/Bonn	185-186
<b>W8.</b>	<b>Spezielle Einflüsse der Fütterung auf die Eutergesundheit im ökologischen Landbau</b> R. Andersson - Osnabrück	187-188
<b>W9.</b>	<b>Survey for feeding and metabolic health of dairy cows in ecological producing farms</b> Katrin Mahlkow-Nerge - Kiel	189
<b>W10.</b>	<b>Aspects of nutrient supply in calves kept under organic farming conditions</b> K. Männer - Berlin	190-191
<b>W11.</b>	<b>Health state in organic dairy farming – metabolic disorders, mastitis, lameness</b> C. Winckler and J. Brinkmann –Vienna/Goettingen	192

## **Communications of the Committee for Requirement Standards Mitteilungen des Ausschusses für Bedarfsnormen**

	<b>Prediction of Metabolisable Energy (ME) in total mixed rations (TMR) for ruminants</b>	195-198
	<b>Empfehlungen zur Energie- und Nährstoffversorgung der Mastputen</b>	199-234
	<b>List of authors</b>	235-242
