Review lecture	
Trace Elements and Immunology	13
Jerry W. Spears, Department of Animal Science, North Carolina State University, Raleigh, North Carolina, U.S.A.	
Metabolism, growth, lactation	
1. Variation of feed intake of dairy cows in consecutive lactations	17
Anika Ocylok, U. Meyer, G. Flachowsky, M. Kaske – Hannover/ Braunschweig/Freising-Weihenstephan	
2. Effects on performance and metabolic parameters of early lactation dairy cows to dietary rumen-protected conjugated linoleic acid and propylene glycol	18
T. Liermann and F. J. Schwarz – Freising-Weihenstephan	
3. Glucose metabolism and its relation to milk production in F₂ offspring of Charolais × Holstein crosses	19
H. M. Hammon, P. Junghans, O. Bellmann, F. Schneider, Rosemarie Weikard and Christa Kühn – Dummerstorf	
4. Metabolic programming of calves: effects of postnatal nutrient supply on the peripheral insulin response	20
Inga Klosinsky, U. Meyer, G. Flachowsky and M. Kaske – Hannover/ Braunschweig/Freising-Weihenstephan	
5. Relevance of acute phase proteins (haptoglobin) for the early diagnosis of fertility disorders	21
M. Füll, B. Füll, G. Hädrich, Franziska Heckel and L. Jäkel – Leipzig/ Arnstadt	
6. Effect of dietary protein content and ration size on growth performance, body composition and utilization parameters of Nile tilapia, <i>Oreochromis niloticus</i>	22
Julia Gaye-Siessegger, S. M. Mamun and U. Focken – Stuttgart- Hohenheim	
7. Antioxidative status of horses after glutamine supplementation and altitude training	23
M. Stohrer, B. Brincker, M. Menn and M. Stangassinger – München	
8. Comparative study on body composition of growing cattle assessed by chemical analysis and by Magnetic Resonance Tomography (MRT)	24
U. Meyer, U. Baulain, S. Brauer and H. Janssen – Braunschweig/ Mariensee	
9. Empty body composition of female calves and heifers [German Holstein Breed] as a function of feeding intensity and live weight	25
H. Janssen, U. Meyer, M. Spolders, G. Flachowsky and Hj. Abel – Braunschweig/Göttingen	

10.	Parameters measured in blood to evaluate metabolic stress: a comparison between the time courses in dairy heifers and cows during the transition period	26
	Helga Sauerwein, Stephanie Hiss, Claudia Weinkauff and Sabrina Hachenberg – Bonn	
11.	Effect of supplements differing in ruminal starch availability on milk yield, blood metabolites and ruminal fermentation in cows grazing ryegrass/clover pasture	27
	Frigga Dohme, Anna Scharenberg and A. Munger – Posieux	
12.	Effect of roughage level in total mixed ration on feed intake, rumen fermentation and chewing activity of rearing calves	28
	Caroline van Ackeren, H. Steingab, R. Funk and W. Drochner – Stuttgart-Hohenheim	
13.	Effect of diet type on milk yield and composition of local and introduced cattle breeds kept at two altitudes in Peru	29
	Karin Bartl, T. Aufdermauer, C.A. Gomez, M. Kreuzer, H.D. Hess and H.-R. Wettstein – Zurich/Lima/Posieux	
14.	Effect of litter size and birth weight on growth performance, carcass characteristics, and meat quality in pigs	30
	J. Berard, M. Kreuzer and G. Bee – Posieux/Zurich	
15.	Effects of variation in incubation temperature on feed intake and performance of broilers	31
	Ingrid Halle, B. Tzschentke and O. Jankel – Braunschweig/Berlin	

Minerals and traceelements

16.	The infrared spectroscopy (IRS) analysis of bone quality in broilers	32
	T. Wertelecki, Dorota Jamroz and R. Zylka – Wroclaw	
17.	Zinc deficiency affects diet selection by the piglet	33
	M. K. Wiltafsky, T. Etle and F. X. Roth – Freising-Weihenstephan/Wien	
18.	Influence of selenium on the regulation of the insulin antagonistic protein tyrosine phosphatase 1B	34
	A. S. Muller, Astrid Bosse and J. Pallauf – Giessen	
19.	Effect of dietary phosphorus level and intracecal pectin infusion on P content in fecal mixed bacterial mass, the intestinal microbial activity and the composition of the ileal bacterial community in pigs	35
	Barbara U. Metzler, Tina Baumgartel, W. Vahjen, M. Rodehutschord and R. Mosenthin – Hohenheim/Halle (Saale)/Berlin	
20.	Carbohydrate effects on precaecal and postileal P and N digestibility and phytate degradation in pigs	36
	Tina Baumgartel, Barbara Metzler, R. Mosenthin, R. Greiner and M. Rodehutschord – Halle (Saale)/Stuttgart-Hohenheim/Karlsruhe	
21.	Effects of several dosage of zeolite A on feed intake and on the mineral metabolism around calving	37
	Hilde Grabherr, M. Spolders, G. Flachowsky and M. Furll – Braunschweig/Leipzig	

22.	Effect of dietary phytase addition and P reduction on performance of fattening pigs during the entire production period	38
	Gabriela Wetscherek-Seipelt, F. X. Roth and W. Windisch – Wien/ Freising-Weihenstephan	
23.	Influence of Bovikalc[®], Ca-Pill[®] and Deliver[®] Dual-Ca on Calcium concentrations as well as other parameters in blood and urine in cows	39
	M. Füll and Imke Körner – Leipzig	
24.	Effect of dietary trace mineral source on lactation performance, reproductive function and culling of dairy cows	40
	F. Toni, L. Grigoletto, C. Rapp, M. T. Socha and D. J. Tomlinson – Correggio/Boxmeer/Eden Prairie	
25.	Trace elements in cows healthy and cows with Abomasal Displacement (DA) as well as further diseases	41
	Andrea Haßler and M. Füll – Leipzig	
26.	Effects of supplementation with increasing levels of iodine on the iodine concentration of tissues and organs in beef cattle	42
	Kristin Weigel, U. Meyer, M. Leiterer, F. Schöne and G. Flachowsky – Braunschweig/Jena	
27.	Iodine status of growing pigs in a dose-response experiment	43
	Katrin Franke, A. Berk, G. Flachowsky, M. Leiterer and F. Schöne – Braunschweig/Jena	
28.	Effect of different dietary selenium on parameters of the antioxidative status and muscle damage in growing turkeys	44
	Julia Fischer, Erika Most and J. Pallauf – Giessen	
29.	Effects of different dietary zinc concentrations and sources on zinc concentrations in different organs and on growth performance of broiler chickens	45
	Petra Hellweg, Daniela Dill and J. Zentek – Berlin	

Fat and lipids

30.	Short-, medium- and long-term effects of polyunsaturated fatty acids on cytosolic phospholipase A2 expression and activity in a canine mast cell line	46
	T. Gück, M. Feige and H. Fuhrmann – Leipzig	
31.	Extent of modification of the fatty acid profile of the early-lactational milk by feeding of ω-3 and ω-6 fatty acids in the dry period	47
	Ruth E. Hochstrasser, Carla Elia, M. Kreuzer, H. Leuenberger, M. Wanner and H.-R. Wettstein – Zürich/Padova	
32.	Effect of conjugated linoleic acid (CLA) supplementation on milk yield and composition of dairy cows	48
	Ch. Brömmel, U. Meyer, M. Wähner and G. Flachowsky – Braunschweig/ Bernburg	
33.	The role of essential fatty acids in the activity and intracellular trafficking of phospholipase D in COS-1 cells	49
	Anja Gemeinhardt, M. Alfalah, T. Gück, H. Fuhrmann – Leipzig/ Hannover	

34. **The influence of different long chain fatty acids on the oxidative status of a canine mastocytoma cell line** 50
S. Schmutzler, T. Gück, A. Seidel and H. Fuhrmann – Leipzig

Transport- and epithelial physiology

35. **Expression of proteins involved in transepithelial calcium-transport in the gastrointestinal tract of sheep** 51
Mirja Wilkens and B. Schröder – Hannover
36. **Short chain fatty acids (SCFAs) and carbon dioxide (CO₂) enhance transepithelial urea transport across the rumen epithelium in sheep** 52
K. Abdoun, F. Stumpff and H. Martens – Khartoum/Berlin
37. **Effects of weaning on chloride secretion in the jejunum of piglets** 53
Julia Kock, B. Schröder and G. Breves – Hannover
38. **New aspects of acetate absorption in the ovine rumen** 54
Sabine Bilk, J. R. Aschenbach, G. Gäbel – Leipzig
39. **Bicarbonate absorption in sheep omasum is indirectly linked to Na transport** 55
M. Beisele H. Martens and C. Siegling-Vlitakis – Berlin
40. **Regulation of NHE-1 and NHE-3 mRNA expression in rumen epithelium of weanling goat lambs** 56
Z. Shen, Lingzhi Sun and H. Martens – Nanjing/Berlin
41. **Dietary modulation of omasal epithelium development in weanling goats** 57
Z. Shen and Q. Zhen – Nanjing
42. **Functional and molecular evidence for SGLT1 and different glucose transporters (GLUT) in the proximal jejunum of growing pigs** 58
Kristina Steglich, Kerstin U. Honscha, G. Gäbel and J. R. Aschenbach – Leipzig
43. **Intestinal glucose and peptide transport in goat kids fed with diets based on milk or soy protein** 59
Jennifer Giere, Ulrike Schönhusen, S. Kuhla and Korinna Huber – Hannover/Dummerstorf
44. **Establishment of a new in-vitro-system for characterization of enteric motor circuits** 60
T. Otto, G. Gäbel and Helga Pfannkuche – Leipzig
45. **Establishment and characterization of a primary culture of porcine colonocytes** 61
Carola Petto, G. Gäbel and Helga Pfannkuche – Leipzig

Digestion

46. **Ruminal fermentation, methanogenesis and C-isotope fractionation of a with forage-only and mixed diets using C₃ and C₄ plants: effects of a methane-suppressing lipid** 62
Fenja Klevenhusen, S. Bernasconi, M. Kreuzer and Carla R. Soliva – Zürich

47.	A quantitative approach to assess fibre adequacy based on physiological responses and diet characteristics in high-yielding dairy cows fed TMR ad-libitum Q. Zebeli, M. Tafaj and W. Drochner – Stuttgart-Hohenheim	63
48.	Effect of forage particle size and concentrate level on chewing activity, ruminal fermentation, digestibility and passage in dairy cows fed slightly restricted I. Weber, Q. Zebeli, M. Tafaj, H. Steingass and W. Drochner – Stuttgart-Hohenheim	64
49.	Fecal crude protein content as an estimate for the digestibility of organic matter ingested in sheep C. Wang, T. Glindemann, L. Schmidt, F. Weißbach, B. M. Tas and A. Susenbeth – Kiel/Braunschweig	65
50.	Comparison of <i>in vivo</i> and <i>in vitro</i> determined organic matter digestibility in a grazing experiment conducted in the natural grasslands of Inner Mongolia Anne Schiborra, T. Glindemann, M. Gierus, C. Wang, A. Susenbeth and F. Taube – Kiel	66
51.	Thermal barley processing increased glycaemic and insulinaemic responses and decreased breath hydrogen production in horses Ingrid Vervuert, Katrin Voigt, Teresa Hollands, Derek Cuddeford, Manfred Coenen – Hannover/Leipzig/Ringstead/Edinburgh	67
52.	Use of a single meal as an <i>in vivo</i> screening test to evaluate the efficacy of novel proteases in pancreatic duct-ligated, fistulated minipigs Anne Möbeler, Caroline Becker, Sonka Zantz, P. C. Gregory and J. Kamphues – Hannover	68
53.	Investigations on effects of different fibre sources on energy intake and excreta quality in nectarivorous pet birds Petra Wolf, Annett-Carolin Häbich and J. Kamphues – Hannover	69
54.	Effect of different dietary fiber on the expression rate of the inflammatory marker genes TGF β and TNF α in the gastrointestinal tract of weaning piglets K. Schedle, M. Pfaffl and W. Windisch – Vienna/Munich	70
55.	Studies with <i>n</i>-alkanes as digestibility markers in poultry in comparison to TiO₂ and acid insoluble ash M. Bulang, A. Kinzler and M. Rodehutschord – Halle (Saale)	71
56.	Ruminal biohydrogenation of α-linolenic acid as affected by plant secondary metabolites <i>in vitro</i> Ratchaneewan Khiaosa-Ard, Sarah F. Bryner, M.R.L. Scheeder, H.-R. Wettstein, M. Kreuzer and Carla R. Soliva – Zürich	72
57.	Comparison of equine caecum content and faeces as inocula in a modified ‘Rumen Simulation Technique’ Bianca Dill, Wiebke Engelmann, K. D. Markuske and Annette Zeyner – Leipzig/Rostock	73
58.	Investigations on chronic incubation of equine caecum content with fructan in a modified ‘Rumen Simulation Technique’ Wiebke Engelmann, Bianca Dill, K. D. Markuske, J. R. Aschenbach and Annette Zeyner – Leipzig/Rostock	74

59. **Comparative investigations on digestion of grazing and browsing rhinoceroses** 75
P. Steuer, M. Clauss, K.-H. Südekum, Sandra Silinski, Susanne Klomburg, G. Nogge, J. Hummel – Bonn/Köln/Zürich/Münster/Osnabrück

Undesired materials

60. **On the transfer of the *Fusarium* toxins deoxynivalenol (DON) and zearalenone (ZON) from the sow to the full-term piglet during the last third of gestation** 76
S. Dänicke, K.-P. Brüßow, T. Goyarts, H. Valenta, K.-H. Ueberschär, U. Tiemann – Braunschweig/Dummerstorf
61. **Investigations about estrogenically active substances in feedstuffs for sows by an *in vitro* bioassay supported by HPLC analysis of genistein and daidzein** 77
Petra Winter, H. Nau and J. Kamphues – Hannover
62. **Effect of an ergot contaminated concentrate on rumen fermentation in cows with different levels of feed intake** 78
Barbara Schumann, S. Dänicke, P. Lebzien and G. Flachowsky – Braunschweig
63. **Effects of live yeast cell supplementation to high concentrate diets on the toxicokinetics of ochratoxin A in sheep** 79
R. Blank and S. Wolffram – Kiel
64. **Impact of *Fusarium*-contaminated triticale in total mixed rations for dairy cows on the microbial communities from rumen *in vitro* (RUSITEC)** 80
E. Strobel, D. Neumann, J. Boguhn, A. Helm, S. Dänicke, U. Meyer and C. C. Tebbe – Braunschweig/Halle (Saale)
65. **Studies on the applicability of the protozoon *Tetrahymena pyriformis* as a biological alternative for the detection of botulinumneurotoxins** 81
N. M. Ständer, W. Schrödl and Monika Krüger – Leipzig

Free topics

66. **Effect of ochratoxin A on differential gene expression in cultured kidney and liver cells** 82
Christine Bösch-Saadatmandi, C. Hundhausen, R. Blank, S. Wolffram, G. Rimbach – Kiel
67. **Effect of a *Ginkgo biloba* extract (EGb761) and its major constituents (terpenoids and flavonoids) on mRNA level of α - and β -secretase in murine brain** 83
Sabine Griggo, S. Wolffram, K. Augustin, Patricia Hübbe, G. Rimbach and R. Cermak – Kiel/Leipzig
68. **Effect of saponin-rich fractions of different plants on rumen fermentation with particular reference to methane emission *in vitro*** 84
G. Goel, H. P. S. Makkar and K. Becker – Stuttgart-Hohenheim

69. **Tissue distribution of the flavonol quercetin and its methylated metabolites in the pig after long-term feeding of a quercetin-containing diet** 85
 Juliane Bieger, R. Cermak, V. de Boer, P. Hollman J. Kamphues, S. Wolffram – Kiel/Wageningen/Hannover
70. **Applicability of a spectrophotometric method for the assessment of oxidative stress in various livestock species** 86
 Helga Sauerwein, T. Schumacher and Sabrina Hachenberg – Bonn

Feeding in ecological animal husbandry

71. **Evaluation of feed quality of organically grown feedstuffs by near infrared reflectance spectroscopy (NIRS)** 87
 Karen Aulrich, H. Böhm – Trenthorst
72. **Amino acid composition in organically grown grain legumes and cereals** 88
 H. Böhm, Karen Aulrich and A. Berk – Trenthorst/Braunschweig
73. **Content of minerals in organically grown grain legumes and cereals** 89
 H. Böhm – Trenthorst

Additives

74. **Effects of different yeast products from *Saccharomyces cerevisiae* on ruminal microbial metabolism *in vitro*** 90
 Hakan Öztürk, Bahri Emre and Gerhard Breves – Ankara/Hannover
75. **Ensiling high moisture triticale grain with lactic acid bacteria (*Lactobacillus plantarum*) - effect on fermentation characteristics and nutritive value in pigs** 91
 B. Pieper, R. Pieper, W. Hackl and U. Korn – Wuthenow/Rostock
76. **Effect of mannan oligosaccharides on broiler chickens fed diets with different dietary fibre contents** 92
 Birgit Prause, Ruth Messikommer and C. Wenk – Zürich
77. **Molecular ecology analysis and short chain fatty acid profiles of intestinal contents in broilers fed with an inulin supplemented diet** 93
 H. Rehman, Petra Hellweg, D. Taras and J. Zentek – Wien/Berlin
78. **Energy and nutrient utilization in growing chicken depending on supplementation of phytogetic feed additives** 94
 Annabell Muhl and F. Liebert – Göttingen
79. **Effects of blackcurrant (*Ribes nigrum* L.) and blueberry (*Vaccinium angustifolium*) on growth and carcass composition of broiler chickens** 95
 Ingrid Halle, U. Bauermann and R. Thomann – Braunschweig/Bergholz-Rehbrücke
80. **Effect of phytase-supplementation in diets of laying hens with reduced amino acid content** 96
 Barbara M. Böhmer, Brigitte R. Paulicks and Dora A. Roth-Maier – Freising-Weihenstephan

81.	Influence of dietary benzoic acid on bone stability and bone metabolism in growing/finishing pigs Kathrin Bühler, Annette Liesegang, S. Gebert and C. Wenk – Zürich	97
82.	Influence of inulin and Na-alginate supplementation on small intestinal microbiota and metabolites in weaning piglets R. Pieper, P. Janczyk, Annette Zeyner and W. B. Souffrant – Dummerstorf/Rostock	98
83.	Effect of nasturtium (<i>Tropaeolum majus</i>) on feed intake, growth performance and intestinal microbiota in weaning piglets R. Pieper, Silvia Haneklaus, A. Berk and W. B. Souffrant – Dummerstorf/Braunschweig	99
84.	Influence of green tea extract on vitamin E status and meat quality in piglets K. Augustin, R. Blank, Christine Bösch-Saadatmandi, J. Frank, Juliane Bieger, Sabine Griggo, S. Wolffram, G. Rimbach – Kiel	100
85.	Application of the probiotic microorganisms and the plant extracts in rabbits breeding Lubica Chrastinová, Mária Chrenková, Andrea Lauková, Monika Simonová, M. Haviarová, R. Szabóová, V. Stropfová, I. Plachá, Z. Vasilková, J. Rafay, L. Ondruška, Š. Faix – Nitra/Košice	101
86.	Feedstuff-specific effects on rumen degradability caused by exogenous enzymes R. Eisenreich, W. Steinberg and F. J. Schwarz – Freising-Weihenstephan/Village-Neuf	102
87.	Impact of phytases and incubation of plant feedstuffs on growth and mineral deposition in carp (<i>Cyprinus carpio</i> L.) L. C. Nwana, R. Eisenreich and F. J. Schwarz – Freising - Weihenstephan	103
88.	Can plant-derived feed additives enhance the growth of trout fry in aquaculture production? Ellen Hoffmann, Natascha Selje and K. Becker – Stuttgart-Hohenheim	104

Animal feed

89.	Field study on effects of feeding coarsely ground diets (including organic acids) on the composition of caecum content (starch content/pH/vfa concentrations) and on salmonella prevalence of slaughtered pigs C. Visscher, Petra Winter, Jutta Verspohl, Janin Stratmann, M. Upmann, M. Beyerbach and J. Kamphues – Hannover	105
90.	Influence of grazing intensity on herbage mass, digestibility, feed intake, and live weight gain of sheep on the Inner Mongolian steppe T. Glindemann, C. Wang, B. M. Tas and A. Susenbeth – Kiel	106
91.	Determination of the praecaecal digestibility of crude protein and amino acids in wheat-based dried distillers' grain with solubles relative to wheat W. Hackl, Antje Pripke, U. Hennig and Annette Zeyner – Rostock/Dummerstorf	107

92. **Effect of replacement of soybean by peas on performance, carcass characteristics and meat quality of growing-finishing pigs** 108
Mária Chrenková, Zuzana Formelová, Ľubica Chrastinová, R. Lahučký, P. Flák and I. Bahelka – Nitra
93. **Evaluation of Tagasaste (*Chamaecytisus palmensis*) Forage as a Substitute for Concentrate in Diets of Sheep** 109
Getnet Assefa, K. J. Peters, C. Kijora, A. Kehaliew and S. Bediye – Berlin/Holetta
94. **Investigations on the ensilability of field bean seeds (*Vicia faba*) harvested before maturation** 110
Annett Gefrom, Edda M. Ott and Annette Zeyner – Rostock
95. **Cell wall composition and ruminal degradability of maize stover** 111
Friederike Flaßhoff, Diane Dobberstein, M. Bunzel, H. Steinhart and F. J. Schwarz – Freising-Weihenstephan/Hamburg
96. **Investigations of degradation of foreign-DNA in the intestinal tract of dairy cows, and of presence of foreign-DNA in blood and milk, after feeding genetically modified corn MON 810** 112
Doreen Hesse, Karen Aulrich, G. Flachowsky – Trenthorst/Braunschweig

Vitamins

97. **Effects of dietary sodium ascorbyl phosphate on oral health in cats** 113
Annabella Khol-Parisini, K. Zetner, Stephanie Krammer-Lukas and J. Zentek – Wien/Kaiseraugst
98. **Assessing parameters of vitamin E bioavailability from different matrices in layer diets. 2. Transfer rates of vitamin E into egg yolk** 114
Angela Sünder, C. Wecke, I. Kadrieh and F. Liebert – Göttingen/Hamburg
99. **Diet-induced oxidative stress in pigs** 115
Miriam Lühring, R. Blank, Sabine Griggo, Juliane Bieger and S. Wolffram – Kiel
100. **Assessing parameters of vitamin E bioavailability from different matrices in layer diets. 1. Gut disappearance** 116
Angela Sünder, C. Wecke, I. Kadrieh and F. Liebert – Göttingen/Hamburg

Aminoacids and nitrogen

101. **Effect of different dietary threonine addition on growth and slaughter performance in finishing pigs** 117
C. Plitzner, T. Etle and W. Windisch – Vienna
102. **¹⁵N incorporation into egg protein fractions after feeding ¹⁵NH₄Cl-containing diets with different crude protein levels to caecectomised hens** 118
H. Kluth, Jeannette Boguhn, M. Bulang and M. Rodehutschord – Halle (Saale)

103.	Estimating intestinal digestibility of feedstuff protein in ruminants with a three-step <i>in situ/in vitro</i> procedure	119
	R. Irshaid, K.-H. Südekum, M. R. Weisbjerg, T. Hvelplund and M. D. Stern – Kiel/Bonn/Tjele/St. Paul	
104.	Influence of feeding regime on dietary selection for lysine by young pigs	120
	T. Ettle and F. X. Roth – Wien/Freising-Weihenstephan	
105.	Meta-analysis on the biological efficiency of two different methionine-sources in broiler chickens	121
	Nadja Sauer, H.-P. Piepho, Katharina Emrich, A. Lemme and R. Mosenthin – Hohenheim/Hanau-Wolfgang	
106.	Comparison of the protein value of concentrate ingredients in the old and new Dutch protein system for dairy cows (DVE/OEB system)	122
	G.G. Brandsma and M.C. Blok – Lelystad	

Energetics

107.	The ¹³C bicarbonate dilution technique to determine energy expenditure in young bulls validated by indirect calorimetry	124
	P. Junghans, J. Voigt, W. Jentsch, C.C. Metges and M. Derno – Dummerstorf	
108.	Evaluation of the German NE system for dairy cows on the basis of an extensive data set from feeding trials	125
	L. Gruber, A. Susenbeth, F. J. Schwarz, B. Fischer, H. Spiekers, H. Steingass, U. Meyer, A. Chassot, T. Jilg and A. Obermaier – Irdning/Kiel/Freising/Iden/Bonn/Stuttgart/Braunschweig/Posieux/Aulendorf/Poing	
109.	A new practical formula to estimate the ME content of roughages	126
	M. C. Blok, G.G. Brandsma and J.L. de Boever – Lelystad/Melle	

Workshop: Energy and protein evaluation for dairy cows

W1.	Energy and protein evaluation systems used for dairy cows in Denmark	129
	T. Hvelplund, M. R. Weisbjerg and P. Lund – Tjele	
W2.	Feed into Milk, An applied feeding model coupled with a new system of feed characterisation: A model for harmonisation?	132
	I. Givens – Reading	
W3.	French AADI system	134
	H. Rulquin and J.-L. Peyraud – Saint Gilles	
W4.	Energy and Protein Systems in Dairy Cows: The Netherlands	136
	S. Tamminga and M. C. Blok – Lelystad
