<b>Review lecture</b>	
<b>Metabolic Programming in Farm Animals</b>	17-26
Cornelia C. Metges, Winfried Otten, Charlotte Rehfeldt – Research Institute for the Biology of Farm Animals (FBN), Research Units ‘Nutritional Physiology’, ‘Behavioural Physiology’, ‘Muscle Biology & Growth’, Dummerstorf	
<b>Metabolism, growth, lactation</b>	
<b>1. Feed intake, milk production and metabolic changes in high-yielding dairy cows fed a diet containing rumen-protected fat during the dry period</b>	27
Kathrin Duske, Anne-Kathrin Langhof, H. M. Hammon, H. M. Seyfert and Cornelia C. Metges – Dummerstorf	
<b>2. TNF-<math>\alpha</math> and fat metabolism in heifers with different body condition (BCS) at parturition</b>	28
M. Füll, N. Jatzke, K. Bauer, I. Steinhöfel, J. Gottschalk, U. Sack and A. Einspanier – Leipzig	
<b>3. Nutritional effects on growth, mammary development and milk yield potential of growing calves and heifers - a review</b>	29
J. D. Lohakare and K.-H. Südekum – Bonn	
<b>4. Effects and post-effects on performance and metabolic parameters of early lactation dairy cows to dietary rumen-protected CLA and rumen protected fat</b>	30
T. Liermann, Angelika-Maria Pfeiffer and F. J. Schwarz – Freising-Weihenstephan/Limburgerhof	
<b>5. Peroxisome proliferator-activated receptor <math>\alpha</math> mediates the up-regulation of novel organic cation transporters and enzymes involved in hepatic carnitine synthesis</b>	31
K. Eder, A. Koch, Bettina König, Gabriele I. Stangl – Halle (Saale)	
<b>6. Effect of feed supplementation with different saponin fractions from <i>Trigonella foenum-graecum</i> on growth and expression of genes encoding GH and IGF-1 in carp, <i>Cyprinus carpio</i></b>	32
W. K. B. Khalil, T. Stadtlander, G. Francis, K. Becker and U. Focken – Giza/Stuttgart-Hohenheim	
<b>7. Investigations on energy and protein requirement in growing pet birds (budgerigars, lovebirds)</b>	33
Petra Wolf and J. Kamphues – Hannover	

8.	<b>Cheese-making properties of the milk of cows fed iso-energetic diets based on feeds typical for arable land and grassland systems</b> F. Leiber, Anita M. Reichmuth, Fenja Klevenhusen, M. Kreuzer and Carla R. Soliva – Zurich	34
9.	<b>Low and high protein diets during pregnancy influence maternal body mass development and composition as well as offspring birth weight in young sows</b> Iris S. Lang, Solvig Görs, P. Junghans, U. Hennig, B. Stabenow, W. Otten, Charlotte Rehfeldt and Cornelia C. Metges – Dummerstorf	35
10.	<b>Metabolic programming of calves: effects of postnatal nutrient supply on the pancreatic insulin response</b> Katrin Röttger, U. Meyer, G. Flachowsky and M. Kaske – Hannover/Braunschweig/Freising-Weihenstephan	36
11.	<b>TNF-<math>\alpha</math> concentrations before and after parturition in healthy and ill cows</b> B. Fürll, G. Hädrich and M. Fürll – Leipzig	37
12.	<b>Investigations on the antioxidative state of dairy goats in the periparturient period</b> L. Locher, A. Rudovsky and M. Fürll – Leipzig	38
13.	<b>Antioxidative status in healthy sows during the periparturient period in a high performance herd</b> T. Sattler, J. Sellmann, S. Müller and M. Fürll – Leipzig/Jena	39
14.	<b>Antioxidative status in sows during the periparturient period in a farm with a high incidence of MMA</b> T. Sattler, S. Derkx, D. Gnielka, S. Müller and M. Fürll – Leipzig/Jena	40
15.	<b>Development of antioxidative status in healthy calves and growing cattle</b> T. Sattler, H. Haser and M. Fürll – Leipzig	41
16.	<b>Effect of mouse strain and lactation day on milk composition of mice</b> Solvig Görs, Marzena Kucia, P. Junghans and Cornelia C. Metges – Dummerstorf	42
17.	<b>Milk production and metabolic changes in high-yielding dairy cows with different dry period length</b> H. M. Hammon, B. Losand, F. Rehbock, Elke Blum, Anne-Kathrin Langhof and P. Sanftleben – Dummerstorf	43
18.	<b>Glucose metabolism in high-yielding dairy cows fed rumen-protected fat</b> H. M. Hammon, Anne-Kathrin Langhof, Kathrin Duske, F. Schneider, H. M. Seyfert and Cornelia C. Metges – Dummerstorf	44
19.	<b>Protein synthesis in jejunal mucosa of goat kids fed milk or soy protein-based diets</b> Ulrike Schönhusen, Anne Flöter, S. Kuhla, P. Junghans, Cornelia C. Metges, K.-J. Petzke, Korinna Huber, R. Žitňan, H. M. Hammon – Dummerstorf/Potsdam-Rehbrücke/Hannover/Košice	45

20. **Contribution of gluconeogenesis to total glucose production in young calves using deuterium oxide - comparison of the mass isotopomer and hexamethylenetetramine approach** 46  
P. Junghans, Solvig Görs, Iris Lang, Julia Steinhoff, H. M. Hammon and Cornelia C. Metges – Dummerstorf
21. **A proteomic approach to evaluate the pituitary hormone profile of feed restricted dairy cows** 47  
B. Kuhla, D. Albrecht, S. Kuhla, P. E. Rudolph and Cornelia C. Metges – Dummerstorf/Greifswald
22. **Expression of adiponectin, adiponectin receptor 1, adiponectin receptor 2, and leptin in subcutaneous adipose tissue during the transition period in dairy cow** 48  
Anneka Lemor, M. Mielenz, A. Hosseini and Helga Sauerwein – Bonn
23. **The decrease of back fat thickness post partum as a parameter of energy balance in Holstein Frisian compared to Simmental cows** 49  
H. Pothmann-Reichl, F. J. Zimmer, Irene Sommerfeld-Stur and Christine Iben – Wien/Wetter
24. **Milk production efficiency of sheep and goats fed different forage qualities and concentrate levels** 50  
L. Gruber, F. Ringdorfer and Elisabeth Pöckl – Irnding

### Minerals and traceelements

25. **Iodine status of thyroid gland in growing-finishing pigs fed rapeseed meal or rapeseed cake in comparison to soybean meal** 51  
A. Berk, H. Wagner and G. Flachowsky – Braunschweig/Kulmbach
26. **Long-term intermittent exogenous parathyroid hormone fargment (ePTH 1-37) application in healthy horses: Impact on calcium and bone metabolism** 52  
Katharina Weisrock, Sarah Winkelsett, W. Martin-Rosset, W. G. Forssmann, Nahid Parvizi, M. Coenen and Ingrid Vervuert – Leipzig/Hannover/Saint-Genés Champanelle/Neustadt a. R.
27. **Effects of long-term intermittent application with equine parathyroid hormone fragment (ePTH 1-37) on endogenous parathyroid secretion in horses** 53  
Ingrid Vervuert, Katharina Weisrock, W.G. Forssmann, Nahid Parvizi and M. Coenen – Leipzig/Hannover/Neustadt a. R.
28. **Endogenous losses of macro minerals via excreta in adult parrots (*Amazona spp.*) fed a semi-synthetic diet in order to determine their requirement at maintenance** 54  
Claudia Westfahl, Petra Wolf and J. Kamphues – Hannover
29. **Investigations on the most qualified samples (serum, liver or cow hair) for analysing copper and zinc supply in dairy cows** 55  
M. Spolders, Haidong Sun, M. Wähner, M. Grün, J. Rehage and G. Flachowsky – Braunschweig/Bernburg/Jena/Hannover

30.	<b>Investigations to the influence of different sources and levels of selenium in the feed of dairy cows on the selenium content of the milk</b> Katja Heerdegen, U. Meyer, G. Flachowsky and H. Schenkel – Braunschweig/Hohenheim	56
31.	<b>Availability of a nutritional dose of selenium in rats</b> Claudia Parys, A.S. Müller and J. Pallauf – Giessen	57
32.	<b>Blood parameters in selenium deficient guinea pigs, rabbits and rats</b> Christine Jensen, Claudia Parys, Susanne Blind and J. Pallauf – Giessen	58
33.	<b>Effects of varying dietary iodine supplementation as iodide or iodate on zootechnical performance, carcass quality and iodine concentrations in tissues of fattening pigs</b> Viktoria Wagner, W. Windisch, S. Swoboda and T. Ertle – Wien	59
34.	<b>Sulphur balance studies in dogs fed a diet supplemented with different sulphur sources (cysteine, calcium sulphate, sublimed sulphur)</b> Maren Janczikowski, Petra Wolf and J. Kamphues – Hannover	60
35.	<b>Effects of different concentrations and forms of dietary zinc oxide on the intestinal concentrations of zinc and on the adherence of Escherichia coli to enterocytes of piglets</b> A. Specht, M. Schurz, P. Hellweg and J. Zentek – Berlin	61

## **Fat and lipids**

36.	<b>Diet effects on the fatty acid profile of caecotrophes, lean and adipose tissue in rabbits</b> H.-R. Wettstein, Janina Meier, F. Leiber, M. Kreuzer, J.-M. Hatt, Bettina Burger and M. Clauss – Zurich	62
37.	<b>Effects of conjugated linoleic acid and sunflower seed on fatty acid composition of cow's milk</b> A. Hoffmann, H. Steingäß and W. Drochner – Stuttgart-Hohenheim	63
38.	<b>Effects of feeding conjugated linoleic acids to dairy cows during the transition period and early lactation upon milk and milk component yields</b> Katrín Metzger-Petersen, K.-H. Südekum, M. Pries, H. van de Sand – Bonn/Münster/Kleve	64
39.	<b>Fatty acid distribution and CLA isomer distribution in serum and liver lipids of CLA supplemented dairy cows</b> G. Jahreis, U. Meyer, M. Kaske, G. Flachowsky – Jena/Braunschweig/Hannover/Freising-Weihenstephan	65
40.	<b>Can long-chain omega-3 fatty acids, provided early in fattening, be recovered in pork at slaughter?</b> Ratchaneewan Khiaosa-Ard, S. Jaturasitha and M. Kreuzer – Zurich/Chiang Mai (Thailand)	66
41.	<b>Effect of selen and docosahexaenoic acid on lipid metabolism of laying hens</b> V. Börner, K. Schäfer and Annette Simon – Berlin	67

42. **Influence of seleno-cystine, seleno-methione, and  $\alpha$ -linolenic acid on the fatty acid profile in *in vitro* incubated ovine ruminal fluid** 68  
Marian Czauderna, J. Kowalczyk, K. M. Niedźwiedzka and R. J. Wallace – Jabłonna/Aberdeen
43. **Influence of selenite, selenate and  $\alpha$ -linolenic acid on the fatty acid profile in *in vitro* incubated ovine ruminal fluid** 69  
Marian Czauderna, J. Kowalczyk, K. M. Niedźwiedzka and R. J. Wallace – Jabłonna/Aberdeen

## Additives

44. **Immune modulating influence of *Echinacea purpurea* as an intermittent feed additive in layers and fattening pigs** 70  
Barbara M. Böhmer, H. Salisch, Brigitte R. Paulicks and F. X. Roth – Freising-Weihenstephan/Poing
45. **Effects of alimentary tannin supplementations on nutrient digestibility and growth performance of weanling piglets** 71  
Brigitte R. Paulicks, G. Biagi and F. X. Roth – Freising-Weihenstephan/Bologna
46. **Effect of insoluble dietary fiber on performance, microbiological and morphological parameters and mRNA expression of inflammatory and cell cycle marker genes in the gut of weaning piglets used as animal model** 72  
K. Schedle and W. Windisch – Vienna
47. **Influence of different application procedures of a probiotic *E. faecium* strain (direct oral dosing vs. supplementation in feed) on bacterial parameter in piglets** 73  
Irina Gordeeva, O. Simon and W. Vahjen – Berlin
48. **Effects of including organic acids or potassium diformate and grinding intensity (coarse/fine) of ingredients in the diet of weaned piglets experimentally infected with *E. coli* or *S. Derby*** 74  
Venja Taube, Marion Neu, Yasmin Hassan, Jutta Verspohl and J. Kamphues – Hannover
49. **Different dietary concentrations of thyme (*thymi herba*) affect thymol concentrations in intestinal and extraintestinal compartments in broilers** 75  
A. Haselmeyer, R. Chizzola, C. Leeb, H. Ur-Rehman and J. Zentek – Wien/Berlin
50. **Effect of mannan oligosaccharides on broiler chickens fed diets with low versus high content of dietary fibers** 76  
Birgit Prause, Ruth Messikommer, P. Spring and C. Wenk – Zurich
51. **Effects of feeding tannins on intestinal mucosa and microflora of weanling pigs** 77  
G. Biagi, B. R. Paulicks, I. Cipollini and F.X. Roth – Bologna/Freising-Weihenstephan

52.	<b>Influence of woad (<i>Isatis tinctoria</i>) and ginkgo (<i>Ginkgo biloba</i>) on growth of broiler chickens</b> Ingrid Halle, R. Thomann, H. Friebel, M. Grün, M. Henning, P. Köhler and G. Flachowsky – Braunschweig/Bergholz-Rehbrücke/Jena/Mariensee	78
53.	<b>Effect of rare earth elements (REE) supplementation on the REE content of tissues and organs in fattening bulls</b> Annett Schwabe, U. Meyer, M. Grün and G. Flachowsky – Braunschweig/Jena	79
54.	<b>Effects of several doses of zeolite A on feed intake, on energy metabolism around calving as well as on milk yield and milk composition in the subsequent lactation</b> Hilde Grabherr, M. Spolders, G. Flachowsky and M. Fürll – Braunschweig/Leipzig	80
55.	<b>Urine pH value and excretion of hippuric acid via urine in pigs fed diets supplemented with benzoic acid</b> H. Kluge, J. Broz and K. Eder – Halle (Saale)/Basel	81
56.	<b>Effects of essential oils, herbs and spices on health, feed conversion and growth of broilers</b> W. Hackl, Annette Zeyner and Monika Krüger – Rostock/Leipzig	82
57.	<b>Effect of benzoic acid on urinary mineral excretion in growing pigs</b> H. D. Hess and A. Gutzwiller – Posieux	83
58.	<b>Feedstuff-specific effects of different concentrations of NSP-hydrolysing enzymes on rumen degradability</b> R. Eisenreich, W. Steinberg and F. J. Schwarz – Freising-Weihenstephan/Village-Neuf	84
59.	<b>Oral bioavailability of quercetin from different quercetin glycosides in dogs</b> Marianne Reinboth, G. Abraham, F. R. Ungemach, S. Wolffram and R. Cermak – Leipzig/Kiel	85
60.	<b>Effect of VITACEL<sup>®</sup> Raw fibre concentrate on zootechnical parameters, health status and the development of the gastrointestinal tract of calves</b> Julia Trautwein und G. Dusel – Bingen am Rhein	86
61.	<b>Effect of lanthanum carbonate octahydrate (Lantharenol<sup>®</sup>) on apparent phosphorus absorption from a conventional feline maintenance diet and a renal diet for cats</b> B. Schmidt, Ute Spiecker-Hauser and J. Gropp – Monheim/Leipzig	87
62.	<b>Effects of the probiotic <i>Enterococcus faecium</i> via defined application on epithelial transport properties in piglet small intestine</b> Ulrike Lodemann, Anja Dillenseger and Holger Martens – Berlin	88

## Digestion

63.	<b>Effect of forage source and feed particle size on fermentation rate and efficiency of microbial protein synthesis in a RUSITEC</b> B. Hildebrand, J. Boguhn and M. Rodehutsord – Halle (Saale)	89
-----	--	----

64.	<b>Influence of repeatedly induced ruminal acidosis on ruminal fermentation and pH fluctuation in dairy cows</b> Frigga Dohme, T. J. DeVries, Karen S. Schwartzkopf-Genswein and Karen A. Beauchemin – Posieux/Lethbridge	90
65.	<b>The impact of different feeding orders of hay or hay chaff combined with a concentrate meal on feed intake pattern in horses</b> Mandy Bochnia, Ingrid Vervuert and M. Coenen – Leipzig	91
66.	<b>Influence of different extracted fiber sources (pectin, cellulose + hemicellulose) to a starchy feed on glycaemic and insulinaemic response in healthy horses</b> Sara Klein, M. Coenen and Ingrid Vervuert – Leipzig	92
67.	<b>The effects of feeding increasing quantities of starch from a compounded feed on glycaemic and insulinaemic responses in healthy horses</b> Ingrid Vervuert, Katrin Voigt, Teresa Hollands, D. Cuddeford and M. Coenen – Leipzig/Hannover/Isip/Edinburgh	93
68.	<b>Cecal microbial metabolism in horses <i>in vitro</i> as affected by erythromycin and feed restriction</b> Manuela Kuhn and G. Breves – Hannover	94
69.	<b><i>Ascaridia galli</i> infestation of pullets and intestinal viscosity - Consequences for nutrient retention and gut morphology</b> S. Dänicke, Eva Moors, A. Beinecke and M. Gauly – Braunschweig/Göttingen/Hannover	95
70.	<b>Starch gelatinisation degree of extruded pigeon feed affects fecal flora, intestinal pH and morphology</b> Enass Abd El Khalek, Isabelle Kalmar, Stephanie Van Weyenberg, G. Werquin and G. P. J. Janssens – Merelbeke/Deinze	96
71.	<b>Is the requirement for ruminally degradable protein per unit of fermentable organic matter the same for all diets?</b> Carla R. Soliva, Carmen Kleiner, S. L. Amelchanka and M. Kreuzer – Zurich	97
72.	<b>Effects of forage source and feed particle size on <i>Clostridium</i> cluster XIV bacteria in a RUSITEC</b> M. Witzig, J. Boguhn and M. Rodehutsord – Halle (Saale)	98
73.	<b>Short-term effects of stocking rate and management system on yield performance and nutritive value of grassland in Inner Mongolia, P. R. China</b> P. Schönbach, H. Wan, Anne Schiborra, Katrin Müller, M. Gierus, B. M. Tas, A. Susenbeth and F. Taube – Kiel	99
74.	<b>Passage rate of the liquid and particle ingesta phase in goat kids fed at different dietary crude protein levels</b> Ursula Boeser, J. Hummel and K.-H. Südekum – Bonn	100
75.	<b>The gastrointestinal flora of healthy lovebirds (<i>Agapornis spp.</i>) fed a starch-, fat- or fibre-rich diet</b> Ulrike Kümmel, Jutta Verspohl, Petra Wolf and J. Kamphues – Hannover	101

## Free topics

76. **Effect of hulless barley varieties with different  $\beta$ -glucan content on intestinal microbiota in pigs** 102  
R. Pieper, R. Jha, A. Van Kessel, B. Rossnagel, W. B. Souffrant and P. Leterme – Dummerstorf/Saskatchewan (Kanada)
77. **Influence of dietary fibre on the oral bioavailability of quercetin (Q) from different Q sources in pigs** 103  
Birga Müller-Siegwardt, R. Blank and S. Wolffram – Kiel
78. **Impact of grazing intensity on feed intake, herbage mass, and animal productivity in the steppe of Inner Mongolia, China** 104  
Katrin Müller, L. Lin, C. Wang, T. Glindemann, Anne Schiborra, P. Schönbach, H. Wan, B.M. Tas, M. Gierus, F. Taube and A. Susenbeth – Kiel
79. **Metabolic and histological traits in quails fed with either transgenic (Bt) or with isogenic maize for several generations** 105  
Nicole Scholtz, Ute Müller, Ingrid Halle, G. Flachowsky and Helga Sauerwein – Bonn/Braunschweig
80. **Suitability of a triaxial accelerometer to monitor behaviour of goats at pasture** 106  
M. Moreau, S. Siebert, A. Buerkert and Eva Schlecht – Kassel/Göttingen
81. **Microbiota in the gastrointestinal tract of weaned piglets with emphasis on yeasts** 107  
V. Urubschurov, P. Janczyk, R. Pieper and W.B. Souffrant – Dummerstorf
82. **Changes in feed resources in Bolivian mountain forests and in their utilisation by cattle during the dry and prehumid season** 108  
Svenja Marquardt, H. Alzérreca, F. D. Encinas, S. Beck, M. Kreuzer and A. C. Mayer – Zurich/Tarija/La Paz (Bolivia)
83. **The influence of trimethylamine (TMA) precursors on TMA content in egg yolks of laying hens in dependence on flavincontaining monooxygenase 3 (FMO3) genotype** 109  
Katja Kretschmar, S. Weigend, S. Dänicke and R. Preisinger – Mariensee/Braunschweig/Cuxhaven
84. **Effects of different doses of sodium chloride on the acid-base balance of horses** 110  
Ann-Marie Müller, Kristin Romanowski, Andreas Vernunft, W. Kanitz, Carola Wolf, Ellen Kienzle, Pat Harris and Annette Zeyner – Rostock/Dummerstorf/München/Waltham
85. **A molecular biological approach to study the ciliated protozoa in the hindgut-flora of horses** 111  
N. M. Ständer and M. Coenen – Leipzig
86. **Birth weight affects muscle fiber size and myosin heavy-chain isoform gene expression in the longissimus muscle of slaughter pigs** 112  
G. Bee and J.-Y. Deru – Posieux

87. **Effect of an experimental *Ascaridia galli* infection and non starch polysaccharides on growth performance and feed utilization in laying hen chicks** 113  
G. Daş, Julia Humburg, M. Gauly and Hj. Abel – Göttingen
88. **Dietary fibre content has a bigger influence on apparent nutrient digestibility in growing/finishing pigs than the bedding material** 114  
Kathrin Bühler, B. Bucher and C. Wenk – Zurich

### Undesired materials

89. **Deoxynivalenol residues in serum, bile and milk of dairy cows fed diets with different concentrate proportions in presence and absence of *Fusarium* toxin contaminated triticale** 115  
Christina Keese, U. Meyer, Hana Valenta, J. Rehage, A. Starke, Ina Weber, G. Breves and S. Dänicke – Braunschweig/Hannover
90. **Effects of deoxynivalenol (DON) contaminated feed and varying supplementation levels of vitamin E and selenium on performance and health of pigs** 116  
Susanne Döll, J. Schrickx, H. Schenkel, Johanna Fink-Gremmels and S. Dänicke – Braunschweig/Utrecht/Hohenheim
91. **Cytotoxic and inflammatory effects of deoxynivalenol (DON) and lipopolysaccharides (LPS) on porcine alveolar macrophages** 117  
Susanne Döll, J. Schrickx, S. Dänicke and Johanna Fink-Gremmels – Utrecht/Braunschweig
92. **Effects of the *Fusarium* toxin deoxynivalenol (DON) and infectious bursal disease virus (IBDV) infection of broilers on RNA, DNA and protein concentration of the *bursa cloacalis* and the spleen** 118  
Julia Pappritz, Silke Rautenschlein, Tanja Goyarts and S. Dänicke – Braunschweig/Hannover

### Transport- and epithelial physiology

93. **Effects of dietary N supply on intestinal glucose transport in ruminating goats** 119  
G. Breves, Alexandra Muscher and B. Schröder – Hannover
94. **Adaptation of intestinal glucose transport in goats to different dietary carbohydrate sources** 120  
Meike Zurich, B. Schröder, Sabine Leonhard-Marek and G. Breves – Hannover
95. **Influence of neurotransmitters on tight junction expression and proliferation of primary cultured epithelial cells from porcine colon** 121  
Carola Petto, G. Gäbel, Martina Böttner, T. Wedel and Helga Pfannkuche – Leipzig/Kiel
96. **Extracellular Mg<sup>2+</sup> status influences expression and functional activity of the rumen epithelium Na<sup>+</sup>/Mg<sup>2+</sup> exchanger** 122  
Monika Schweigel, T. Viergutz and M. Kolisek – Dummerstorf/Berlin

97.	<b>Intrinsic neural regulation of epithelial secretion in the porcine proximal colon</b>	123
	Helga Pfannkuche, Carola Petto and G. Gäbel – Leipzig	
98.	<b>Detection of NHE1 and NHE3 mRNA in omasal epithelium of weanling goat</b>	124
	Z. Shen, L. Sun, H. Zhao, W. Yang and H. Martens – Nanjing/Berlin	
99.	<b>Electrogenic transport mechanisms for short-chain fatty acids in sheep rumen epithelium</b>	125
	R. Rackwitz, J. Aschenbach, Petra Philipp and G. Gäbel – Leipzig	

### **Animal feed**

100.	<b>Energetic Evaluation of Glycerol in Ruminants</b>	126
	Eva Eckl, H. Steingäß and W. Drochner – Stuttgart-Hohenheim	
101.	<b>Investigations on Cry1Ab protein transfer: Analysis of blood plasma and milk of dairy cows fed genetically modified maize (MON810)</b>	127
	V. Paul, Christiane Albrecht, P. Gürtler, Kerstin Steinke, W. Preißinger, Steffi Wiedemann, H. Spiekers, F. J. Schwarz and H. H. D. Meyer – Freising-Weihenstephan/Grub/Bern	
102.	<b>Resistance of the cutaneous gastric mucosa to acid challenge depends on the physical form of the diet in reared piglets</b>	128
	Sabine Leonhard-Marek, Verena Keller and J. Kamphues – Hannover	
103.	<b>Effects of the diet's physical form (meal/pellets), particle size and addition of lignocellulose on the integrity of gastric mucosa in reared piglets</b>	129
	Verena Keller, Venja Taube, A. Beineke, Sabine Leonhard-Marek and J. Kamphues – Hannover	
104.	<b>Effect of including dried distillers grains with solubles (DDGS) as a protein source in diets of fattening broilers</b>	130
	I. Youssef, Claudia Westfahl and J. Kamphues – Hannover	
105.	<b>Ensilaging natively moist seeds of field bean and pea and the influence of conservation on tannins</b>	131
	Annett Gefrom, Edda Maria Ott and Annette Zeyner – Rostock	
106.	<b>Model silages in comparison: vacuum packed Rostock model silages (ROMOS) versus glass jar silages</b>	132
	Sandra Hoedtke, Edda Maria Ott and Annette Zeyner – Rostock	
107.	<b>Investigations on the ensilability of Common vetch seeds (<i>Vicia sativa</i>)</b>	133
	D. Marquardt, Edda Maria Ott, Lisa Dittmann and Annette Zeyner – Rostock	
108.	<b>Effect of rapeseed cake on the performance of laying hens</b>	134
	Anna Selena Röttger, I. Halle, S. Dänicke and G. Flachowsky – Braunschweig	
109.	<b>Interaction of chemical composition and ruminal degradability of maize stover of different varieties and at various stages of maturity</b>	135
	Friederike Zeller and F. J. Schwarz – Freising-Weihenstephan	

110. **Effects of diets' physical form (grinding intensity; meal/pelleted) on the milieu (pH, chloride concentration and dry matter content) within the stomach content of pigs** 136  
Sylvia Köttendorf, Anne Mößeler and J. Kamphues – Hannover
111. **Effect of grinding intensity in complete diets on feces quality (water content / consistency) of sows at different stages of reproduction** 137  
Anne Warzecha, Anne Mößeler, Petra Wolf and J. Kamphues – Hannover

## Vitamins

112. **Induction of a mild diet-induced oxidative stress and effects of quercetin (Q) on the  $\alpha$ -tocopherol (TOC) and oxidative status in piglets** 138  
Miriam Lühring, R. Blank and S. Wolffram – Kiel
113. **The influence of thiamine supplementation and varying roughage/concentrate proportions on selected fermentation parameters in RUSITEC** 139  
Denise Völker, Liane Hüther, Wiebke Bigalke and Hj. Abel – Göttingen/Braunschweig
114. **Effects of a niacin supplementation at different forage-to-concentrate ratios on milk parameters and milk fat composition of dairy cows** 140  
Inka-Donata Niehoff, Liane Hüther and P. Lebzien – Braunschweig

## Aminoacids and nitrogen

115. **Effect of dietary fibre sources on the basal endogenous losses of amino acids measured at the terminal ileum of broilers** 141  
H. Kluth and M. Rodehutschord – Halle (Saale)
116. **A low protein diet modulates electrolyte metabolism in goats** 142  
Alexandra Muscher, G. Breves and Korinna Huber – Hannover
117. **Influence of dietary protein supply on liver metabolism in growing goats** 143  
Korinna Huber, Diana Peters, M. Rodehutschord, E. Pfeffer and G. Breves – Hannover/Halle/Bonn
118. **Antagonism between branched-chain amino acids affects Isoleucine requirement of the piglet** 144  
M. K. Wiltafsky and F. X. Roth – Freising-Weihenstephan
119. **Dietary lysine concentration influences plasma and tissue carnitine concentrations in piglets** 145  
Maren Fischer, F. Hirche, H. Kluge, K. Eder – Halle (Saale)
120. **Effect of exocrine pancreatic insufficiency (experimentally induced by ligation of the pancreatic duct) on endogenous nitrogen losses (prececal and total) in fistulated minipigs fed an almost N-free diet** 146  
Anne Mößeler, H. Loock, Jessamyn Classen, P. C. Gregory and J. Kamphues – Hannover

<b>121.</b>	<b>Effect of graded dietary tryptophan levels on L-[1-<sup>13</sup>C]leucine oxidation and nitrogen deposition in growing pigs</b> U. Hennig, P. Junghans, J. Bartelt, C. Relandeau, A. Tuchscherer, Cornelia C. Metges – Dummerstorf/Cuxhaven/Paris	147
<b>122.</b>	<b>Determination of standardized ileal digestibilities of crude protein and amino acids in legume seeds for grower pigs</b> D. Jezierny, R. Mosenthin and M. Eklund – Stuttgart-Hohenheim	148
<b>123.</b>	<b>Effect of dietary fibre in threonine limiting diets on nitrogen retention in growing pigs</b> Britta Blank, Eva Schlecht and A. Susenbeth – Kiel/Witzenhausen	149
<b>124.</b>	<b>Determination of the Valine requirement of piglets</b> M. K. Wiltafsky, B. Schmidlein and F. X. Roth – Freising-Weihenstephan	150
<b>125.</b>	<b>Comparison of different procedures for determination of apparent digestibility of crude protein in poultry diets</b> Angela Sünder, Claudia Westfahl, I. Youssef, J. Kamphues and F. Liebert – Göttingen/Hannover	151
<b>126.</b>	<b>Investigations to improve the reliability of optimal dietary amino acid ratio concepts in growing chicken</b> C. Wecke and F. Liebert – Göttingen	152
<b>127.</b>	<b>Effect of dietary amino acid profile on the <math>\delta^{13}\text{C}</math> of selected amino acids in rainbow trout, <i>Oncorhynchus mykiss</i></b> U. Focken, J. S. O. McCullaugh and Julia Gaye-Siessegger – Stuttgart-Hohenheim/Oxford	153
<b>128.</b>	<b>Variation in plant-mediated proteolysis among 10 diploid perennial ryegrass (<i>Lolium perenne</i> L.) genotypes</b> M. Lösche, H. Salama, M. Gierus, A. Herrmann, P. Voss and F. Taube – Kiel	154

## **Energetics**

<b>129.</b>	<b>Studies on energy requirement for growing pigs kept under practical housing conditions</b> Maike Naatjes, Helga Andree and A. Susenbeth – Kiel	155
<b>130.</b>	<b>Effects of weight loss programs in cats with dry foods differing in protein content</b> Brigitta Wichert, Barbara Zottmaier, B. Bucher, C. Wenk and M. Wanner – Zurich	156

## **Effects on the environment**

<b>131.</b>	<b>Inhibitory effect of four saturated fatty acids on different methanogenic <i>Archaea</i> in pure cultures</b> S. Bucher, L. Meile, M. Kreuzer and Carla R. Soliva – Zurich	157
<b>132.</b>	<b>Methanogenic potential and C-isotope fractionation during methane formation as determined in dairy cows fed three diet types represented by either C<sub>3</sub>- or C<sub>4</sub>-plants</b> Fenja Klevenhusen, S. M. Bernasconi, M. Kreuzer, Carla R. Soliva – Zurich	158

- 133. Methane reduction potential of tannins-containing plants using an *in vitro* rumen fermentation system** 159  
A. Jayanegara, H. P. S. Makkar and K. Becker – Stuttgart-Hohenheim

**Workshop: Potenziale der Tierernährung zur Verbesserung der Ressourceneffizienz**

- W1. Emissions of greenhouse gases and gaseous air pollutants – a challenge for animal nutrition** 163  
U. Dämmgen and H.-D. Haenel – Braunschweig
- W2. Nutrition: Key to methane mitigation in ruminants** 168  
M. Kreuzer and Carla R. Soliva – Zurich
- W3. Utilisation and excretion of nitrogen in livestock – Key points** 172  
A. Susenbeth – Kiel
- W4. Can we further improve the efficiency of utilisation of phosphorus? M. Rodehutschord – Halle (Saale)** 179
- W5. High contents of Zinc and Copper in dung from agricultural livestock: a problem to animal nutrition?** 184  
W. Windisch, T. Kickinger and H. Würzner – Wien

**Communications of the Committee for Requirement Standards of the Society of Nutrition Physiology**

Mitteilungen des Ausschusses für Bedarfsnormen
