Review lecture	
Energy demand and energy metabolism in the immune system B. Kaspers, Ludwig-Maximilians-Universität, Tierärztliche Fakultät, Veterinärwissenschaftliches Department, Tierphysiologie, München	17-21
Amino acids and nitrogen	
1. Isoleucine and valine requirement studies in growing pigs - preliminary results C. Wecke, L. Hyfing and F. Liebert – Göttingen	23
2. Total ileal endogenous losses and true ileal digestibilities of crude protein and amino acids in soybean meal, rapeseed meal and peas for pigs M. Eklund, W. R. Caine, W. C. Sauer, G. S. Huang, G. Diebold, M. Schollenberger and R. Mosenthin – Stuttgart-Hohenheim/Lacombe/Edmonton/Ludwigshafen	24
3. Urinary excretion of purine derivatives in cattle in response to an increase in energy and nitrogen intake U. Dickhoefer and A. Susenbeth - Kiel	25
4. <i>In situ</i> ruminal degradation of crude protein and amino acids and <i>in vitro</i> protein digestibility of undegraded protein in rapeseed meals H. Steingäß, G. Kneer and M. Rodehutschord – Stuttgart-Hohenheim	26
5. Influence of dietary nitrogen supply on renal urea and electrolyte excretion in growing goats Svenja Starke, Alexandra Muscher, G. Breves and Korinna Huber – Hanover	27
6. Influence of different feed treatments on protein utilization parameters in growing chicken C. Wecke, N. Engelmeier, H. Graf von Reichenbach and F. Liebert – Göttingen/Reinbek	28
7. Inclusion of metabolic availability of amino acids is needed for protein evaluation of processed plant protein sources Anja Pastor and F. Liebert – Göttingen	29
8. Investigations on praecaecal digestibility of crude protein and amino acids from untreated and ethanolic treated rape seed meal in minipigs with ileorectal anastomosis Kirsten Büsing, W. Hackl, Antje Priepeke, Lisa Dittmann, Kathleen Fischer, M. Wähner and Annette Zeyner - Rostock/Dummerstorf/Bernburg	30
9. Investigations on amino acids in the milk of mares in mid, late and very late lactation Stephanie Witten, Kristin Romanowski and Annette Zeyner – Rostock	31

10. **Variation in plant-mediated proteolysis among red clover (*Trifolium pratense* L.) cultivars and the relationship with the polyphenol oxidase activity** 32
Margitta Seebeck, Nina Weiher, Petra Voss, F. Taube and M. Gierus - Kiel

Energy

11. **Effects of differences in fat mobilisation during early lactation on feed intake, milk performance and hepatic glucose and fat metabolism in high-yielding dairy cows** 33
Claudia Weber, F. Becker, B. Losand, Cornelia Hametner, W. Kanitz and H. M. Hammon - Dummerstorf
12. **Endocrine profile and hepatic gene expression in dairy cows during a negative energy balance in early lactation and during an energy-restriction at 100 days in milk (DIM)** 34
J. Groß, F.J. Schwarz, H. Anette van Dorland and R.M. Bruckmaier – Freising-Weihenstephan/Posieux/Bern
13. **HSL expression and activation in subcutaneous and retroperitoneal adipose tissue of periparturient dairy cows** 35
Lena Locher, J. Rehage, S. Dänicke and Korinna Huber - Hanover/Braunschweig
14. **Metabolic responses in lactating dairy cows to an induced hypoglycemia for 48 hours** 36
H.A. van Dorland, L. Kreipe, M. Vernay, A. Oppliger, O. Wellnitz and R.M. Bruckmaier – Posieux/Bern
15. **Effect of multiple intravenous injections of butaphosphan and cyanocobalamin on the metabolism of periparturient dairy cows** 37
M. Füll, A. Deniz, B. Westphal, C. Illing and P.D. Constable – Leipzig/Leverkusen/Neukirchen/Purdue
16. **Changes of muscle amino acids, glycogen, and fat concentrations of dairy cows during the periparturient period** 38
B. Kuhla, S. Görs and Cornelia C. Metges – Dummerstorf
17. **Effects of colostrum versus formula feeding on glucose transporters in skeletal muscle of neonatal calves** 39
Ulrike Schönhusen, Charlotte Rehfeldt, Julia Steinhoff-Wagner and H. M. Hammon –Dummerstorf
18. **Vitamin B₁₂ concentrations in blood serum of cows with disturbed energy metabolism** 40
M. Füll, K. Arndt and D. Goerigk - Leipzig
19. **Relations between peripartal metabolism of heifers and their productive life** 41
M. Füll, St. Ackermann, L. Jäkel and D. Goerigk – Leipzig/Arnstadt
20. **Determination of the energy requirement for maintenance and the efficiency of energy utilization for growth in juvenile turbot (*Psetta maxima*)** 42
C. Dietz, S. Kröckel, C. Schulz and A. Susenbeth – Kiel
21. **Metabolizable energy (ME) intake and estimated ME requirement of Warmblood-type stallions in youth training – a pilot study** 43
Katrin Sophie Edelmann, Kristin Romanowski, Stefanie Reckendorf, E. Mohr and Annette Zeyner – Rostock

Digestion

22. **Grass, foliage, lucerne – what difference does forage type make for digestion?** 44
J. Hummel, A. Kassab, H. Lüttgenau and K.-H. Südekum – Bonn/Sohag
23. **Concentrations of starch and fat in excreta of fattening turkeys: acting as indicators for digestive capacity and/or its limitation?** 45
H. Stolle, Stefanie Bank, D. Radko, R. Günther and J. Kamphues - Hanover
24. **Influence of intake level on digestive variables in dairy goats** 46
Eva Findeisen, J. Hummel and K.-H. Südekum – Bonn
25. **Differences in fibre digestion as realized by large herbivores - an approach using an *in vitro* test** 47
P. Steuer, K.-H. Südekum, M. Clauss and J. Hummel – Bonn/Zurich
26. **Effects of roughage quality in the diet on particle dynamics and digestion in the rumen of dairy cows** 48
Q. Zebeli, Kerstin Frick, Juliane Streicher, Evi Niederheiser and W. Drochner – Vienna/Stuttgart-Hohenheim
27. **Final conclusions about nutrient and energy digestibility of a young stallion diet as investigated under field conditions** 49
D. Koslowski and F. Liebert – Göttingen

Transport and epithelial physiology

28. **Electrophysiological analysis of glucose transport in the porcine jejunum and ileum** 50
J. Herrmann, B. Schröder and G. Breves – Hanover
29. **Cholinergic modulation of epithelial integrity in the porcine colon** 51
Szilvia Lesko, Carola Petto, G. Gäbel and Helga Pfannkuche – Leipzig
30. **Secretory responses to combinations of enteric neurotransmitters in the porcine proximal colon** 52
Anja Mauksch, G. Gäbel and Helga Pfannkuche, Leipzig
31. **Urea, ammonia, and the regulation of ruminal pH** 53
F. Stumpff, Lu Zhonyan, D. Günzel, J.R. Aschenbach and H. Martens – Berlin/Nanjing
32. **Regulatory influences on monocarboxylate transporter 1 (MCT1) in ovine ruminal epithelial cells** 54
Franziska Benesch, Kerstin U. Honscha, Ines Urbansky and G. Gäbel - Leipzig
33. **Does MCT1 play a role in ruminal SCFA transport?** 55
Franziska Dengler, Anke Schmidt-Mähne, R. Rackwitz and G. Gäbel – Leipzig
34. **Permeation of short-chain fatty acids (SCFA) across rumen epithelium: electrogenic pathways** 56
R. Rackwitz, Petra Philipp, Anke Schmidt-Mähne and G. Gäbel – Leipzig
35. **Identification of differentially expressed proteins in rumen epithelium in response to a concentrate supplemented diet** 57
Angelika Bondzio, C. Gabler, Brit Badewien-Rentzsch, Petra Schulze, H. Martens and R. Einspanier – Berlin

36. **Effect of luminal ammonia on ruminal urea transport is modulated by transmural potential difference** 58
Z. Lu, F. Stumpff and H. Martens – Nanjing/Berlin
37. **Dietary effects on *in vitro* Na⁺ and acetate transport rates in sheep omasum** 59
O. Ali, I. Rabbani, H. Martens and Carolin Deiner –
Khartoum/Lahore/Berlin

Minerals

38. **Influence of feeding anionic salts and 25-hydroxyvitamin D3 as a mineral premix on periparturient dairy cows' calcium metabolism with special emphasis on the duration of the application** 60
Imke Cohrs, Inga Oberheide, Mirja Wilkens, Elisabeth Azem, B. Schröder and G. Breves –Hanover/Basel
39. **Pathways of elimination for additional potassium applied directly to the rumen or duodenum of dairy cows** 61
Maren Wagener, Annkatrin Ott, P. Lebzien, Petra Wolf, Kerstin Müller and Sabine Leonhard-Marek – Hanover/Braunschweig/Berlin
40. **Experimental studies on tolerance of cattle regarding different salt concentrations in drinking water** 62
C. Visscher, S. Witzmann, M. Beyerbach and J. Kamphues – Hanover
41. **Basic data on calcium metabolism in chinchillas – with special regard to incisors' composition** 63
Stefanie Hansen, Petra Wolf and J. Kamphues – Hanover
42. **Effects of an extra vitamin D3 and/or calcium and phosphorus supply via drinking water on calcium and phosphorus metabolism of broilers fed a conventional complete diet** 64
K. Fritz, Mirja Wilkens, B. Schröder and J. Kamphues - Hanover
43. **Effects of various feeding conditions (iodine supply, salt water, feeding algae powder) on the iodine content in blood and urine of cattle** 65
S. Witzmann, C. Visscher, M. Höltershinken, J. Senkpiel, P. Rust and J. Kamphues – Hanover
44. **Comparison of approaches for evaluating availability of mineral P sources in broilers** 66
Y. Shastak, Maren Witzig and M. Rodehutschord – Stuttgart-Hohenheim
45. **Characterizing the quality of phosphorus in diets for swine and poultry by laboratory analyses focussed on water solubility** 67
J. Kamphues, B. Bodmann, D. Pohl and P. Rust – Hanover
46. **Effect of different dietary phosphorus sources on plasma phosphorus concentration in growing pigs three hours postprandial** 68
Bianca Schmidt, Katharina Linke, Anne Ebert, Lisa Bachmann and M. Coenen – Leipzig
47. **Effect of selenium source in the breeder diet on metabolic indices of day-old turkeys** 69
Jan Jankowski, Katarzyna Sartowska, A. Koncicki and Z. Zdunczyk -
Olsztyn
48. **Influence of rising iodine supplementation and iodine source on the iodine content in tissues and thyroid hormones of fattening pigs** 70
Qimeng Li, Christiane Mair, K. Schedle and W. Windisch – Vienna

49.	Effects of different oral doses of sodium chloride on acid-base and mineral balance of exercised horses fed a hay-based diet	71
	Kristin Romanowski, Sandra Hacke, A. Vernunft, W. Kanitz, Ellen Kienzle, M. Fürll and Annette Zeyner – Rostock/Dummerstorf/München/Leipzig	
50.	Measurement of bone mineral content and bone density in young chinchillas fed different calcium levels in the diet	72
	Petra Wolf, Annette Liesegang, Stefanie Hansen, K. Fritz and J. Kamphues – Hanover/Zurich	
51.	Effects of sodium and potassium content in the diet and floor heating on development and severity of foot pad dermatitis (FPD) in young fattening turkeys	73
	A. Abd El-Wahab, C. F. Visscher, A. Beineke, M. Beyerbach and J. Kamphues – Hanover	

Undesirable substances

52.	Investigations on the toxicokinetic and carry over of ochratoxin A in lactating goats	74
	R. Blank, May Looff, M. Mobashar, Anne Westphal and K.-H. Südekum – Kiel/Bonn	
53.	Individual and combined effects of deoxynivalenol (DON) and lipopolysaccharides (LPS) on blood parameters in pigs	75
	Bianca Brosig, Susanne Döll, Patricia Panther, H.-J. Rothkötter and S. Dänicke – Braunschweig/Magdeburg	
54.	Effects of graded levels of deoxynivalenol (DON) on performance and immune related parameter of piglets	76
	Susanne Döll, Andrea Hönscheid and S. Dänicke – Braunschweig	
55.	Ruminal ochratoxin A degradation – contribution of different microbial groups and influence of diets	77
	M. Mobashar, R. Blank, J. Hummel and K.-H. Südekum – Bonn/Kiel	
56.	Carry over of PFOA and PFOS from contaminated feed into milk and meat of sheep – pilot study	78
	Janine Kowalczyk, Susan Ehlers, H. Schafft, P. Fürst and Monika Lahrssen-Wiederholt – Berlin/Münster	
57.	Carry-over of PFCA and PFAS with different chain length from feed into sheep tissue - pilot study	79
	Susan Ehlers, Janine Kowalczyk, P. Fürst, H. Schafft, Monika Lahrssen-Wiederholt and H.-U. Humpf – Münster/Berlin	
58.	Effect of deoxynivalenol (DON) on health and performance of laying hens of different genetic background	80
	M. Ebrahim, Susanne Döll and S. Dänicke – Braunschweig	
59.	Effects of deoxynivalenol (DON) on rooster semen, body and organ weights	81
	Christine Ehling, Susanne Döll, M. Ebrahim, Ulrike Taylor, U. Baulain and S. Dänicke – Mariensee/Braunschweig	
60.	Effect of graded levels of T-2 toxin on laying hens	82
	Katrin Wilkerling, Susanne Döll, Hana Valenta and S. Dänicke – Braunschweig	

Fatty acids

61. **Effect of rumen-protected conjugated linoleic acids (CLA) on body composition and body fat and protein mobilization / accretion of dairy cows** 83
D. von Soosten, U. Meyer, E. M. Weber, J. Rehage, G. Flachowsky and S. Dänicke – Braunschweig/Hanover
62. **Effects of rumen-protected conjugated linoleic acids (CLA) on proliferation and cytokine expression of bovine blood mononuclear cells (PBMC) and splenocytes *ex vivo*** 84
Lydia Renner, D. von Soosten, Anja Sipka, Susanne Döll, H.-J. Schuberth and S. Dänicke – Braunschweig/Hanover
63. **The effect of a long term dietary supplementation with conjugated linoleic acid (CLA) on the composition of bovine peripheral blood mononuclear cells (PBMC) and the concentration of IgG isotypes in blood and milk** 85
Jamal Hussien, S. Dänicke and H.-J. Schuberth – Hanover/ Braunschweig
64. **Influence of a rumen-protected conjugated linoleic acid mixture on carcass traits and meat quality in young Simmental heifers** 86
Gloria Schlegel, R. Ringseis, M. Shibani, E. Most, F. J. Schwarz and K. Eder – Gießen/Freising
65. **Effects of changing degree of dietary fat saturation on the fatty acid profile of the adipose tissue of immunocastrated pigs and barrows** 87
C. Pauly and G. Bee - Posieux
66. **Fatty acid analysis in feed and chyme samples of pigs - effect of sample preparation (acid hydrolysis) on fatty acid concentration - with special emphasis on long chain fatty acids** 88
Anne Mößeler, N. Kramer, P. Rust, Katharina Kalla, P.-C. Gregory and J. Kamphues – Hanover
67. **The impact of membrane lipid composition on the oxidative metabolism of macrophages** 89
Stephanie Adolph, H. Fuhrmann and Julia Schumann – Leipzig
68. **Plasma fatty acid composition as indicator for changes in erythrocyte fatty acid composition after supplementation of n-3 fatty acids in dogs** 90
Katja Stöckel, Lisa Bachmann and H. Fuhrmann – Leipzig
69. **Effect of physical treatments of canola seed on biohydrogenation of fatty acids** 91
M.M. Farghaly, S.M. Abdel-Raheem and Christine Iben – Wien
70. **Glucose metabolism in dairy cows supplemented with rumen-protected conjugated linoleic acid (CLA) – first results** 92
H. M. Hammon, Kristin Hötger, Solvig Görs, Maria Becker, Claudia Weber, A. Tröscher and Cornelia C. Metges – Dummerstorf/Limburgerhof
71. **Effects of supplementation of dairy cow rations with rumen-protected conjugated linoleic acids (CLA) on rumen metabolism** 93
Julia Pappritz, U. Meyer, P. Lebzien, G. Flachowsky and S. Dänicke – Braunschweig
72. **Effect of feeding rapeseed fat either as seed or oil on fatty acids in the milk of dairy cows** 94
Sarah Görlich, A. Hoffmann, H. Steingaß, Karin Hartung and M. Rodehutschord – Stuttgart-Hohenheim

73.	Effects of rumen protected conjugated linoleic acids on fatty acid distribution of selected tissues of dairy cows	95
	R. Kramer, S. Dänicke, D. von Soosten and G. Jahreis – Jena / Braunschweig	
74.	Immunohistochemical localisation of the glucocorticoid receptor in adipose tissue of dairy cattle after CLA supplementation	96
	Kathrin Friedauer, Susanne Häußler, D. von Soosten, S. Dänicke and Helga Sauerwein - Bonn/Braunschweig	
75.	The effect of 9-cis:11-trans conjugated linoleic acid (CLA), 15d-PGJ2 and GW9662 on the proliferation of bovine peripheral blood mononuclear cells <i>in vitro</i>	97
	Jamal Hussien and H.-J. Schuberth - Hanover	

Feed additives

76.	Influence of the flavonoids quercetin and rutin on ruminal fermentation processes	98
	M. Holstermann, R. Blank and S. Wolffram - Kiel	
77.	Effects of <i>Saccharomyces cerevisiae</i> supplementation on apparent nutrient digestibility of a hay-corn diet and fermentation profile in healthy horses	99
	Elke Mackenthun, M. Coenen and Ingrid Vervuert – Leipzig	
78.	Oral bioavailability of quercetin in horses	100
	Silvia Wein and S. Wolffram – Kiel	
79.	Investigating the molecular effects of carnitine supplementation in the liver of piglets by DNA microarray analysis	101
	Robert Ringseis, J. Keller, S. Priebe, R. Guthke, H. Kluge and K. Eder – Gießen/Jena/Halle (Saale)	
80.	Impact of <i>Enterococcus faecium</i> NCIMB 10415 on performance and immune parameters in sows and piglets	102
	Lydia Scharek-Tedin, R. Pieper and J. Zentek - Berlin	
81.	Effects of dietary supplementation of biotin, zinc and mannan oligosaccharide on foot pad dermatitis in fattening turkeys housed on dry and wet litter	103
	I. Youssef, A. Beineke and J. Kamphues – Hanover	
82.	Influence of short chain and medium chain fatty acids on the gastrointestinal microbial ecology of weaned piglets	104
	F. Ferrara, R. Pieper, W. Vahjen and J. Zentek - Berlin	
83.	Influence of <i>Enterococcus faecium</i> NCIMB 10415 on small intestinal brush border enzyme activity and gene expression in weaned pigs	105
	L. Martin, R. Pieper, W. Vahjen, A.G. Van Kessel and J. Zentek – Berlin	
84.	Influence of <i>Enterococcus faecium</i> NCIMB 10415 on intestinal barrier function in weaned piglets	106
	J.F. Richter, J.D. Schulzke and M. Fromm – Berlin	
85.	Effects of thymol or carvacrol levels on feed intake and performance of broilers	107
	A.A.A. Abdel-Wareth, Saskia Kehraus, Friederike Hippenstiel and K.-H. Südekum – Bonn	

Methane

86. **Enteric methane emission in relation to growth performance in fattening systems for bulls based on either grass silage or maize silage** 108
Sabrina M. Staerfl, Johanna O. Zeitz, M. Kreuzer and Carla R. Soliva – Zurich
87. **Leads fumaric acid to a metabolic acidosis when fed to growing bulls?** 109
Nicole Remling, Sabrina Hachenberg, U. Meyer, M. Höltershinken, A. Beineke, G. Flachowsky and S. Dänicke – Braunschweig/Hanover
88. **Does fumaric acid reduce ruminal methane production by influencing the population structure of *Archaea* community?** 110
Susanne Becker and G. Breves – Hanover
89. **Effect of tannin extracts on fermentation of grass silage and microbial yield in a rumen simulation** 111
G. Wischer, Jeannette Boguhn, H. Steingaß and M. Rodehutschord – Stuttgart-Hohenheim
90. **Mixtures of tropical forages of different quality: do they act additively or synergistically on *in vitro* ruminal fermentation?** 112
A. Jayanegara, Svenja Marquardt, M. Kreuzer and F. Leiber – Zurich

Feedstuff evaluation and feeding

91. **Effect of dry matter content and speed of wilting on protein and amino acids in silage** 113
Bronwyn Edmunds, H. Spiekers, H. Nußbaum, R. Bennett, Angela Schröder and K.-H. Südekum – Bonn/Poing/Aulendorf/Antony/Herentals
92. **Determination of the dry matter dependent osmotic effect as a parameter for evaluating silage quality** 114
Sandra Hoedtke, K. Friedel, M. Gabel and Annette Zeyner – Rostock
93. **Effect of buckwheat and chicory silage on milk fat quality** 115
Tasja Kälber, M. Kreuzer and F. Leiber – Zurich
94. **Feeding barley grain-based diets processed with lactic acid and heat modulated the response of rumen endotoxin and plasma metabolites in dairy cows** 116
Q. Zebeli, Summera Iqbal, A. Mazzolari, Suzanna M. Dunn and B. N. Ametaj – Vienna/Edmonton
95. **Influence of donor animals and their feeding on *in vitro* fermentation and microbial protein synthesis** 117
Jeannette Boguhn, T. Zuber and M. Rodehutschord – Stuttgart-Hohenheim
96. **Effects of *Knautia arvensis* (L.) on *in vitro* rumen fermentation parameters** 118
M. Szumacher-Strabel, A. Cieślak, P. Zmora, E. Pers-Kameczyc, J. Mołdoch, W. Oleszek and A. Stochmal – Poznan/Puławy
97. **Buckwheat grain as a feed component in layer diets: effects on egg quality** 119
F. Leiber and Ruth Messikommer – Zurich
98. **Effect of elderberry pomace supplementation on zootechnical and antioxidative parameters in early weaned piglets** 120
R. Blank and S. Wolffram – Kiel

99.	Influence of carbohydrate composition in barley varieties on intestinal <i>Salmonella typhimurium</i> colonization in a 'Trojan' challenge model in pigs	121
	R. Pieper, J. Bindelle, Gita Malik, J. Marshall, B. Rossnagel, P. Leterme and A.G. Van Kessel – Saskatoon/Berlin	
100.	Replacement of fish meal with rapeseed protein concentrate in diets fed to wels catfish (<i>Silurus glanis</i> L.)	122
	H. Slawski, Halime Adem, R.-P. Tressel, K. Wysujack, U. Koops, S. Würtz and C. Schulz – Büsum	
101.	Effects of varying levels of grass silage in isoenergetic diets for fattening bulls	123
	T. Etle, A. Obermaier, H. Spiekers, H. Meiser and S. Weinfurtner — Grub	
102.	Description and modelling of the intake of ME and crude protein of fattening bulls	124
	K. Rutzmoser, T. Etle and H. Schuster — Grub	
103.	The effect of adaptation and choice among different steppe shrubs on intake of Syrian fattailed sheep	125
	Janina S. Meier, M. Louhaichi, Monika Zaklouta, Barbara Rischkowsky, M. Kreuzer and Svenja Marquardt – Zurich	
104.	Interactions of alpine vegetation type and sheep breed in their effects on fattening performance and meat quality	126
	Helen Willems, M. Kreuzer and F. Leiber – Zurich	
105.	<i>In situ</i> ruminal dry matter degradation of maize grain as affected by variety, conservation method and harvest date	127
	A. Metwally, Friederike Zeller and F.J. Schwarz – Freising-Weihenstephan	
106.	<i>In vitro</i> studies on the effects of grass silage containing low true protein on γ-Aminobutyric Acid (GABA) in bovine ruminal fluid	128
	Sarah Theermann, Nina Gresner, K. Eicken, H. Scholz, H. Bollwein and M. Hoeltershinken – Hanover	
107.	Effect of donor animal species and their feeding on the composition of the microbial community in a Rusitec	129
	Maren Witzig, Jeannette Boguhn, Franziska Leinweber, M. Zeder and M. Rodehutschord – Stuttgart-Hohenheim/Zurich	
108.	Variation in condensed tannin composition in sainfoin (<i>Onobrychis viciifolia</i>) accessions as determined by thiolytic degradation and gel permeation chromatography	130
	B.N. Azuhwi, B. Boller, H.D. Hess, Frigga Dohme-Meier, M. Kreuzer, E. Stringano and Irene Mueller-Harvey – Posieux/Zurich/Reading	
109.	Nutritional value of banana pseudostem (<i>Musella lasiocarpa</i>) for fattening pigs	131
	M. Baihaqi, S. Riedel, Eva Schlecht and Anne Schiborra - Kassel-Witzenhausen and Göttingen	
110.	Effect of spray dried porcine blood and bone by-products on hens performance and content of bioactive substances in egg	132
	Dorota Jamroz, J. Orda, A. Wiliczekiewicz, Jolanta Skorupińska, Teresa Skiba and Małgorzata Kaźmierska – Wrocław	
111.	Effects of lignin rich dietary fibre on zootechnical performance, carcass characteristics as well as dry matter and NH₃ content in excrements of broiler chicks	133
	K. Schedle, Veronika Trunk and R. Leitgeb - Vienna	

Free topics

112. **Investigations on the role of PPAR α on the expression of components of the ubiquitineproteasome system in skeletal muscle of mice** 134
