Review Lecture	
Spongiform encephalopathies in humans and animals	17
M. H. Groschup* – Greifswald – Insel Riems	
Feed stuff evaluation & feeding	
1. Reducing human edible inputs in dairy cattle by substituting cereals and pulses with by-products	19
*Ertl P., Zebeli Q., Knaus W. – Vienna	
2. Milk yields and protein efficiency of dairy cows at restricted concentrate feeding	20
*Leiber F., Dorn K., Probst J. K., Spengler-Neff A. – Frick	
3. Performance of lactating dairy cows fed different proportions of red clover silage in the diet.	21
*Schulz F., Westreicher-Kristen E., Knappstein K., Molkentin J., Susenbeth A. – Kiel	
4. <i>In situ</i> ruminal crude protein and starch degradation characteristics of wheat grain	22
Seifried N., Steingäß H., Hoffmann N., *Rodehutschord M. – Stuttgart	
5. Effects of two different alfalfa formulations (chaff vs pellets) on gastric mucosa in weanlings	23
Vondran S., Venner M., *Vervuert I. – Leipzig/Destedt	
6. A field study on the feeding of high performance show jumpers	24
*Kienzle E., van Ost S., Swagemakers J.-H. – Oberschleißheim/Bakum	
7. Suitability of plantal <i>n</i>-alkanes for the estimation of dry matter intake and apparent digestibility in horses - pilot study	25
*Bachmann M., Wensch-Dorendorf M., Bulang M., Zeyner A. – Halle (Saale)	
8. Levels of precaecal digestible crude protein for various horse feedstuffs	26
*Leberl P., Nüse P., Schraut S., Böttger C., Südekum K.-H., Schenkel H. – Stuttgart/Bonn	
9. Effects of feed structure and protein source on performance and intestinal-immunological parameters of fattening pigs	27
*Liermann W., Berk A., Frahm J., Bösch V., Dänicke S. – Braunschweig	
10. Morphometric traits of the Peyer's patch (as a sign of local immune response) in relation to different physical forms of one complete diet fed to growing pigs	28
*Cappai M. G., Koop F., Pistis L., Sander S. J., Dimauro C., Pinna W., Kamphues J. – Sassari/Hanover	
11. First results from laboratory studies about effects of added lactic acid bacteria and enzymes on fermentation of liquid feeds for pigs	29
*Lau N., Liebert F., Kramer E. – Göttingen	
12. Formula compared to sow milk feeding changes morphology, barrier function and immune response in the small intestine of new-born piglets	30
*Scharek-Tedin L., Röhe I., Zetzsche A., Kröger S., Rieger J., Zentek J., Pieper R. – Berlin	
13. Effect of grinding intensity and hydrothermal processing of blue sweet lupin on apparent ileal digestibility of proximate nutrients and amino acids in pigs	31
*Pieper R., Taciak M., Świąch E., Barszcz M., Skomial J., Zentek J. – Berlin/Jablonna	
14. "Swine Protein Meal" (SPM) as a protein source in broiler diets: Effects on performance, composition of excreta and litter as well as on foot pad health	32
Kölln M., Loi-Brügger A., *Kamphues J. – Hanover/Friesoythe-Kampe	
15. Maintaining the activity of NSP-splitting enzymes during feed production: required for high litter quality and food pad health of broilers	33
Ratert C., Abd El-Wahab A., Sander S. J., Üffing B., Witte M., *Kamphues J. – Hanover	

16. Influence of different maize genotypes in diets without and with added phytase on precaecal InsP₆ hydrolysis and P digestibility in turkeys	34
Ingelmann C.-J., Witzig M., Schollenberger M., Möhring J., Kühn I., *Rodehutschord M. – Stuttgart/Darmstadt	
17. First applications of novel protein hydrolysates from animal by-products as fish meal substitute in fish diets - effect on growth performance and protein utilization in Nile tilapia	35
*Dietz C., Liebert F. – Göttingen	
18. Protein quality assessment of novel protein sources from thermal hydrolysed animal by-products in the laboratory rat	36
*Zorn F., Winter B., Liebert F. – Göttingen/Berlin	
19. Substitution of common concentrates with by-products: Effects on ruminal fermentation, nutrient degradation, and microbiota <i>in vitro</i> (Rusitec)	37
*Ertl P., Knaus W., Zebeli Q. – Vienna	
20. Does pressure affect <i>in vitro</i> rumen fermentation? A comparison of pressure-release systems for <i>in vitro</i> incubation of feed substrates	38
*Castro-Montoya J., Klir Z., Dickhoefer U. – Stuttgart	
21. Investigation of changes in the bacterial microbiom in the large intestine of calves fed with pectin containing milk replacer	39
*Kieckhäven S., Büsing K., Zeyner A. – Rostock/Halle (Saale)	
22. Impact of a pectin supplementation <i>via</i> milk replacer on calves' performance and occurrence of diarrhoea	40
*Kieckhäven S., Büsing K., Zeyner A. – Rostock/Halle (Saale)	
23. Glycaemic and insulinaemic response and feed intake patterns of sport ponies following iso-energetic intake of a low-starch mixed feed high in fat and fibre or oats	41
*Bochnia M., Gottschalk J., Einspanier A., Schuerer C., Hillegeist D., Greef J. M., Zeyner A. – Halle (Saale)/Leipzig/ Braunschweig-Völkenrode	
24. Ensiling moist seeds of field beans and the influence of conservation on contents of oligosaccharides, tannins and vicine/convicine	42
*Gefrom A., Balko C., Zeyner A. – Rostock/Gross-Lüsewitz/Halle (Saale)	
25. Effects of treating barley with citric or lactic acid on the resistant starch content and changes in nutrient composition	43
*Harder H., Khol-Parisini A., Zebeli Q. – Vienna	
26. Comparison of an indirect photometric method for determination of phytate with inositol phosphate determination in different corn conserves	44
Humer E., *Schedle K. – Vienna	
27. Effects of grinding method, particle size, and physical form of the diet on the distribution and relative frequency of intraepithelial lymphocytes in the small intestine of laying hens	45
*Röhe I., Scharek-Tedin L., Zentek J. – Berlin	
28. Replacement of soybean oil cake by <i>Hermetia illucens</i> meal in diets for layers	46
Maurer V., Amsler Z., Stamer A., *Leiber F. – Frick	
29. Influence of different dietary methionine to cystine ratios on growth performance, feed efficiency and protein deposition in meat type chicken	47
*Sünder A., Wecke C., Liebert F. – Göttingen	
30. Amino acid composition of novel protein sources from thermal hydrolysis of pig and poultry by-products	48
*Sünder A., Höhling A., Liebert F. – Göttingen/Berlin	
31. Effect of dried mango peels on intestinal microbial metabolites in piglets	49
*Brucker L., Geerkens C. H., Carle R., *Zentek J. – Berlin/Stuttgart	

Digestion

32. Effect of age at experimental induction of exocrine pancreatic insufficiency in young pigs on growth, body composition (relative weight of the gastrointestinal tract) and serum leptin concentration	50
*Möbeler A., Piechotta M., Beyerbach M., Kamphues J. – Hanover	
33. Correlations between performance parameters and level of faecal <i>Lawsonia intracellularis</i> shedding in clinically-apparent, clinically-inapparent and vaccinated piglets	51
*Visscher C., Mischok J., Sander S. J., Kamphues J. – Hanover	
34. Digestibility of diets containing different proportions of differently processed whole-plant corn silage in growing pigs between 40 and 60 kg bodyweight	52
Hohmeier S., *Kamphues J. – Hanover	
35. Effects of 2-stage grinding in production of compound feeds on digestibility, performance and gastric health in weaned piglets	53
Borgelt L., Ratert C., Kölln M., Neumann K.-D., *Kamphues J. – Hanover	
36. The presence and localization of type 1 cannabinoid receptor in the mandibular gland of young pigs: influences of different physical form of diet	54
*Dall'Aglio C., Cappai M. G., Mercati F.I Ceccarelli P., Kamphues J. – Perugia/Sassari/Hanover	
37. Influence of starch source on the <i>in vitro</i> production of skatole and indole by porcine fecal bacteria	55
*Sander S. J., Elsinghorst P. W., Fischer J., Kamphues J. – Hanover	
38. Influence of supplementing diets with mineral phosphorus and phytase on gastrointestinal tract microbiota of broilers	56
Camarinha-Silva A., Witzig M., Green-Engert R., Zeller E., Seifert J., Hoelzle L., *Rodehutsord M. – Stuttgart	
39. Comparison of different feed efficiency traits in broiler chickens	57
*Molnár A., Hollman M., Zebeli Q., Magowan E., Hawken R. J., Lawlor P. G., Metzler-Zebeli B. U. – Vienna Hillsborough/Siloam Springs/Fermoy	
40. Effect of silage type in ruminant rations on the abundance of different microbial groups in the rumen of dairy cows during a day	58
*Lengowski M., Witzig M., Möhring J., Seyfang G., *Rodehutsord M. – Stuttgart	
41. Reticuloruminal pH dynamics during transient and persistent subacute ruminal acidosis in dairy cattle: a long-term evaluation with a wireless sensor	59
*Pourazad P., Qumar M., Wetzels S., Khiaosa-ard R., Klevenhusen F., *Zebeli Q. – Vienna	
42. A study of the roles of bicarbonate and short chain fatty acids in ruminal buffering	60
Hille K., Hetz S., Pieper R., *Stumpff F. – Berlin	
43. Changes in body reserves with regard to energy- and protein intake and -yield in dairy cows fed barley-based diets treated with lactic acid and heat during early lactation	61
*Khol-Parisini A., Gruber L., Gschaider S., Zebeli Q. – Vienna/Raumberg Gumpenstein	
44. Digestibility of neutral and acid detergent fibre - a meta-analysis in dairy cows	62
*Gorniak T., Hummel J. – Göttingen	
45. Effects of feeding different energy supply on the microbiota attached to the rumen wall in goats	63
*Wetzels S. U., Mann E., Metzler-Zebeli B. U., Wagner M., Klevenhusen F., Schmitz-Esser S., *Zebeli Q. – Vienna	
46. Effects of treating barley grain with citric or lactic acid with or without inorganic phosphorus supplementation on <i>in vitro</i> fermentation characteristics	64
*Harder H., Khol-Parisini A., Metzler-Zebeli B., Zebeli Q. – Vienna	

47. <i>In situ</i> and total tract nutrient degradation in dairy cows fed barley-based diets treated with lactic acid and heat	65
Sizmaz I., Khol-Parisini A., Gschaider S., Abdel Raheem S., Gruber L., *Zebeli Q. – Vienna/Raumberg-Gumpenstein	
48. Continuous recording of pH in the forestomach of dairy cows using two different measurement systems	66
Falk M., Munger A., *Dohme-Meier F. – Posieux	
49. Effects of supplementing maize silage with different nitrogen sources on ruminal fermentation <i>in vitro</i>	67
Witzig M., Muller K., Lengowski M., Mohring J., *Rodehutschord M. – Stuttgart	
50. Feed intake, chewing behaviour and digestibility in dairy cows of different age fed Swiss standard or zero-concentrate diets	68
*Grandl F., Luzi S. P., Furger M., Brandenburger C., Zeitz J. O., Kreuzer M., Schwarm A. – Zurich/Landquart/Gieen	
51. Establishing an <i>in vitro</i> model to evaluate the effects of subacute ruminal acidosis on rumen microbial ecology in cattle	69
*Mickdam E., Metzler-Zebeli B., Klevenhusen F., Khiaosa-ard R., *Zebeli Q. – Vienna/Qena	
52. Effects of enzymatically modified starch product on serum lipids in growing pigs	70
*Metzler-Zebeli B., Eberspacher E., Zebeli Q. – Vienna	
53. Alterations in the cecal bacterial metagenome in response to resistant starch type 4 in growing pigs	71
*Metzler-Zebeli B., Schmitz-Esser S., Mann E., Zebeli Q. – Vienna	
54. Expression of pro-inflammatory NF-κB and anti-oxidative Nrf2 target genes in different parts of the intestine of pigs between weaning and day 21 post-weaning	72
*Fiesel A., Dyck J., Gessner D. K., Eder K. – Gieen	
55. Effects of type and concentration of dietary fat on alkane recovery in broilers	73
Schafers S., Bulang M., Danicke S., *Zeyner A. – Halle (Saale)/Braunschweig	
Feed additives	
56. Comparison of the effect of two phytases alone and in combination with formic acid on phosphorus-, calcium- and zinc retention in pig	74
*Baum C., Blank R., Ader P., Oberfrank U., Susenbeth A. – Kiel	
57. Supplementation with Quaternary Benzo(c)phenanthridine Alkaloids Decreases Salivary Cortisol and Salmonella Shedding in Pigs after Transportation to the Slaughterhouse	75
*Artuso-Ponte V., Gebreyes W., Moeller S., Rajala-Schultz P. – Columbus	
58. DON biomarker study in pigs: Efficacy of Biomin® BBSH 797 to biotransform DON to less toxic DOM-1	76
*Schaumberger S., Hofstetter U. – Herzogenburg	
59. Impact of zinc oxide on the development of enterobacterial antibiotic resistance genes directly after weaning in piglets	77
*Vahjen W., Zentek J. – Berlin	
60. The effect of different application forms of (n-)butyrate on the intestinal activity of cytochrome P450 enzymes in chicken	78
*Kulcsar A., Matis G., Molnar A., Petrilla J., Wagner L., Febel H., Huber K., Neogrady Z. – Budapest/Vienna/Keszthely/Herceghalom/Hanover	
61. Bioavailability of quercetin from different onion extracts in cattle	79
*Beyer B., Wolfram S. – Kiel	
62. Effects of 6-wk intraduodenal supplementation of quercetin on blood parameters and energy metabolism in periparturient dairy cows	80
Stoldt A.-K., Derno M., Nurnberg G., Starke A., Wolfram S., *Metges C. C. – Dummerstorf/Leipzig/Kiel	

63. Influence of a grape seed and grape marc meal extract (GSGME) on milk yield, hepatic expression of genes involved in inflammation and endoplasmic stress response and antioxidant parameters in dairy cows	81
*Gessner D. K., Koch C., Romberg F.-J., Winkler A., Dusel G., Herzog E., Most E., Eder K. – Gießen/Münchweiler/ Bingen	
64. Effects of monensin and essential oils on the energy metabolism of periparturient dairy cows	82
*Drong C., Meyer U., von Soosten D., Frahm J., Rehage J., Dänicke S. – Braunschweig/Hanover	
65. Tissue distribution of quercetin in rainbow trouts after feeding of quercetin-containing diets over 4 weeks	83
*Ansari F.I Hansen K., Blank R., Wolffram S. – Kiel	
66. Effects of low dietary inclusion of red alga Nori on growth and and feed utilization of rainbow trout	84
*Stadtlander T., Häfliger J., Studerus K., Kreuzer M. – Frick	
67. Bioavailability of a single dose of catechins administered intraduodenally in high-yielding German Holstein cows	85
*Metges C. C., Gohlke A., Wolffram S. – Dummerstorf/Kiel	
68. Effects of prepartum energy supply and nicotinic acid supplementation on immunological and biochemical parameters of periparturient dairy cows differing in parity	86
*Tienken R., Frahm J., Meyer U., Kersten S., Rehage J., Dänicke S. – Braunschweig/Hanover	
69. Bioavailability of catechins from a green tea extract after intraruminal application in cattle	87
*Beyer B., Wein S., Wolffram S. – Kiel	
70. Effects of supplementing plant derived alkaloids on ruminal fermentation during normal and subacute ruminal acidosis conditions in RUSITEC	88
*Mickdam E., Klevenhusen F., Khiaosa-ard R., Metzler-Zebeli B., Ghareeb K., Zebeli Q. – Vienna/Qena	
71. Effect of essential oil supplementation on rumen fermentation characteristics in rumen fistulated cows	89
Deml M., Fahn C., *Windisch W. – Freising	
72. Effects of a natural plant antioxidant premixture on milk yield, antioxidative status and the expression of genes involved in endoplasmic stress response in dairy cows	90
Maurer V., Amsler Z., Stamer A., *Leiber F. – Frick	
73. Effect of essential oil supplementation on rumen fermentation characteristics in rumen fistulated cows	91
Metwally A., Deml M., Fahn C., *Windisch W. – Zagazig/Freising-Weihenstephan	
74. Effect of individual medicinal plants and mixtures thereof on <i>in vitro</i> ruminal fermentation	92
Müller A., Wang S., Hilfiker D., Marquardt S., Braun U., Kreuzer M., *Schwarm A. – Zurich	
75. Relationships between milk odd and branched-chain fatty acids and urine-based microbial protein synthesis indicators in dairy cattle supplemented with quebracho tannin extract	93
*Castro-Montoya J., Henke A., Köhling I., Knappstein K., Molkenthin J., Susenbeth A., Dickhoefer U. – Stuttgart/Kiel	
76. Effects of different milk diets and quercetin feeding on parameters concerning antioxidative and health status in neonatal calves	94
Gruse J., Mielenz M., Wolffram S., *Hammon H. – Dummerstorf/Kiel	
77. Daily quercetin supplementation over a period of two weeks results in a moderate accumulation of total plasma flavonols in horse	95
*Wein S., Wolffram S. – Kiel	

78. Effects of an <i>in vitro</i> challenge with enterotoxigenic <i>Escherichia coli</i> on jejunal epithelia from piglets of a feeding trial with probiotic supplementation	96
*Lodemann U., Amasheh S., Radloff J., Kern M., Bethe A., Wieler L. H., Pieper R., Zentek J., Aschenbach J.R. - Berlin	
79. Expression of the natural killer cell receptor NKG2D on jejunal epithelium and the impact of <i>Bacillus cereus</i> var. Toyoi on the absolute cell count of intraepithelial immune cell populations in piglets	97
*Altmeyer S., Zentek J., Scharek-Tedin L. - Berlin	
80. Effect of supplementation of two different β-mannanase sources on broiler performance	98
*Shastak Y., Ader P., Elwert C. - Lampertheim/Wettin-Loebejunn	
81. Efficacy of phytase supplementation in uncoated and coated form in male broiler chickens	99
*Maenner K., von Heimendahl E., Kinzinger S. L. - Cuxhaven/Berlin	
82. Effect of a mono-component protease on ileal digestibility and protein utilization of a grower diet in meat type chicken	100
*Khan D. R., Wecke C., Liebert F. - Göttingen	
83. Influence of a yeast cell wall product on the performance parameters and the composition and activity of the intestinal microbiota of broiler chickens	101
Vodde H., *Zentek J. - Berlin	
84. Effect of a combination of Benzophenanthridine and Protopine alkaloids on nitrite production of lipopolysaccharide challenged macrophages and on intestinal lesions of broilers challenged with <i>Clostridium perfringens</i>	102
*Schmitt J., Qureshi M. A., Steiner T., Williams M. - Eltville/Raleigh/Washington	
85. Nutritional modulation of insulin and incretin homeostasis by butyrate in broiler chickens	103
*Matis G., Kulcsar A., Petrilla J., Neogrady Z. - Budapest	
86. Effects of NSP degrading enzymes on precaecal nutrient digestibility and arabinoxylan degradation in turkeys	104
*Kluge H., von Heimendahl E., Kinzinger S. L., Stangl G. I. - Halle (Saale)/Cuxhaven	
87. Quercetin induces hepatic gamma-glutamyl hydrolase expression in rats by suppressing hepatic miRNA rno-miR-125b-3p	105
*Wein S., Laviano A., Wolfram S. - Kiel/Rome	
Environment	
88. Does methane emission of dairy cows change with age?	106
*Grandl F., Brandenburger C., Kreuzer M., Schwarm A. - Zurich/Landquart	
89. Methane production by avian herbivores	107
Frei S., Ortmann S., Hatt J.- M., Kreuzer M., *Clauss M. - Zurich/Berlin	
90. Heat stress adaption of fat metabolism in transition cows	108
Lamp O., Derno M., *Kuhla B. - Dummerstorf	
91. Integrating dynamics of feed intake and metabolic oxidation in late pregnant Holstein cows kept under high ambient temperatures	109
Eslamizad M., Lamp O., Derno M., *Kuhla B. - Dummerstorf	
Energy	
92. Calculated requirement of ME and pcD lysine in growing finishing boars	110
*Berk A., Dänicke S., Otten C., Weber M., Büsing K., Zeyner A., Müller S. - Braunschweig/Iden/Rostock/Halle(Saale)/Bad Salzungen	
93. Impacts of parturition, energy supply and lactation number on glucose uptake of bovine monocyte subsets	111
*Eger M., Hussen J., Dänicke S., Schuberth H.- J., Breves G. - Hanover/Braunschweig	

94. Responses of metabolism and performance to repeated short-term feed-restrictions and LPS induced systemic inflammations in dairy cows	112
*Gross J., Kalaitzakis E., Wellnitz O., Bollwein H., Bruckmaier R. – Bern/Zurich	
95. Metabolic load and dairy cow health-related parameters in herbage based feeding systems	113
*Zbinden R., Gross J., Falk M., Mürger A., Dohme-Meier F., Bruckmaier R. – Bern/Posieux	
96. Insulin signaling in adipose tissues of periparturient dairy cows under the influence of an energy-dense diet and nicotinic acid supplementation	114
*Kenez A., Locher L., Meyer U., Tienken R., Rehage J., Dänicke S., Huber K. – Hanover/Oberschließheim/Braunschweig	
97. Relationship between circulating leptin concentrations and adipocyte mitochondria in nonlactating dairy cows during a course of overcondition	115
*Laubenthal L., Locher L., Sultana N., Winkler J., Meyer U., Rehage J., Dänicke S., Sauerwein H., Häussler S. – Bonn/Hanover/Braunschweig	
98. Fractional gluconeogenesis estimate in sheep measured by deuterium oxide method does not differ between intravenous and intraruminal administration routes of D₂O	116
*Metges C. C., Görs S., Das G., Agarwal U., Bequette B. J. – Dummerstorf/College Park	
99. Indicator substances in breath samples of early lactation dairy cows for detection of subclinical ketosis	117
*von Soosten D., Leppert J., Boeker P., Meyer U., Frahm J., Dänicke S. – Braunschweig/Bonn	
100. Effects of intensive milk feeding in calves on intestinal growth, immune status and hepatic energy metabolism	118
Schäff C., Heide K., Zitnan R., Stefaniak T., Jawor P., *Hammon H. – Kosice/Wroclaw/Dummerstorf	
101. Estimation of total body fat mass by bioelectrical impedance analysis and deuterium-oxid-dilution method in cows - a validation study	119
Schäff C., Pliquet U., Görs S., Pfuhl R., Tuchscherer A., Metges C., Hammon H., *Weber C. – Dummerstorf/Heiligenstadt	
102. Responses to an energy deficiency in early and mid-lactation and its implication to robustness of dairy cows	120
*Gross J., Bruckmaier R. – Bern	
103. Effects of metabolic and inflammatory challenges on cortisol secretion in dairy cows	121
*Gross J., Wellnitz O., Bruckmaier R. – Bern	
104. Cholesterol metabolism during a negative energy balance in dairy cows at two stages of lactation	122
*Kessler E., Gross J., Albrecht C., Bruckmaier R. – Bern	
Undesirable Substances	
105. Bioavailability of deoxynivalenol (DON) and DON sulfonates 1, 2 and 3 in pigs fed with sodium sulfite treated DON contaminated maize	123
*Paulick M., Kersten S., Winkler J., Schatzmayr D., Schwartz-Zimmermann H. E., Dänicke S. – Braunschweig/Tulln	
106. Aspects of nutritional ecology including hypoglycin A concentration in various organs of the genus maple (Acer) – relevance for the sickness atypical myopathy in horses	124
*Aboling S., Cavalleri J., Cehak A., Johnson J., Ziegler J., Sander J., Kamphues J. – Hanover/Halle (Saale)	
107. Concentration profiles of zearalenone (ZEN), deoxynivalenol (DON) and their metabolites in bovine blood plasma and follicular fluid	125
*Winkler J., Kersten S., Valenta H., Stinshoff H., Meyer U., Wrenzycki C., Engelhardt U., Dänicke S. – Braunschweig/Gießen	

Fatty Acids

- 108. Impact of tannin extracts from sainfoin and birdsfoot trefoil on *in vitro* ruminal biohydrogenation of polyunsaturated fatty acids** 126
*Grosse Brinkhaus A., Bee G., Pellikaan W. F., Dohme-Meier F. – Posieux/Zurich/Wageningen
- 109. Effect of conjugated linoleic acid on concentrations of fat-soluble vitamins in milk of lactating ewes** 127
*Zeitj J., Most E., Eder K. – Gießen
- 110. Effect of lauric acid as dietary fat source on broiler performance, gut morphology and gut microbes** 128
*Zeitj J., Fennhoff J., Kluge H., Stangl G. I., Eder K. – Gießen/Halle (Saale)
- 111. Influence of a partial exchange of fat in the diet by palm kernel oil on feed intake, growth and health-indicators in Ross 708 broiler chicken** 129
*Hankel J., Abd El-Wahab A., Weiß H., Taube V., Visscher C. – Hanover/Mansura/Twistingen
- 112. Dietary fish oil inhibits signalling pathways involved in inflammation and endoplasmic reticulum stress in the liver of sows during lactation** 130
*Gessner D. K., Gröne B., Rosenbaum S., Most E., Hillen S., Becker S., Erhardt G., Reiner G., Ringseis R., Eder K. – Gießen
- 113. The impact of polyunsaturated fatty acids on the receptor association of TLR4 and CD14 in murine macrophages** 131
Schoeniger A., Fuhrmann H., Schumann J. – Leipzig
- 114. Dietary supplementation with conjugated linoleic acid during early lactation in dairy cows: effects on the concentrations of vitamin E congeners in serum and liver** 132
*Sadri H., Dänicke S., Rehage J., Frank J., Sauerwein H. – Bonn/Braunschweig/Hanover/Stuttgart
- Other Topics**
- 115. Is stomach passage a barrier against specific *Escherichia coli* (responsive for post weaning diarrhoea) experimentally applied to weaned piglets?** 133
von und zur Mühlen F., Sander S., Verspohl J., *Kamphues J. - Hanover
- 116. Fattening performance and carcass conformation of dual purpose poultry genotypes in comparison to broiler and layer genotypes** 134
*Müller S., Scheuss K., Gangnat I. D. M., Kreuzer M., Messikommer R. E. – Zurich
- 117. Natural *Campylobacter* infections in broiler fattening - is there an influence of dietary concepts on prevalence and extent of infection** 135
*Visscher C., Ahmed M. E. F., Hankel J., Abd El-Wahab A., Taube V., Kamphues J. – Hanover/Mansoura/Twistingen
- 118. Are fattening turkeys of modern lines affected by a Hashimoto like thyroiditis?** 136
Plesch P., Bellof G., *Kienzle E., Schade B., Breithaupt A. – Triesdorf/Oberschleißheim/Poing/Berlin
- 119. Ontogeny of the circulating adiponectin concentrations in neonatal calves: the importance of colostrum intake** 137
Kesser J. K., Hill M., Koch C., Hammon H., Sauerwein H., *Sadri H. – Bonn/Münchweiler a.d. Alsenz/Dummerstorf
- 120. Locomotive and feeding behaviour as well as growth performance of beef calves on seasonal mountain pastures: influence of the presence of adult females** 138
*Gangnat I. D. M., Kreuzer M., Berard J. – Zurich
- 121. Effect of rearing intensity during early postnatal life on long-term pancreatic β -cell development in Holstein-Friesian bull calves** 139
Prokop L., Kaske M., Kunz H.- J., Lucius R., Maccari P., *Wiedemann S. – Kiel/Zurich/Blekendorf/Hanover

122. Metaproteomics: analysing the active fraction of the broiler gut and rumen associated microbiota	140
*Seifert J., Tilocca B., Deusch S. – Stuttgart	
123. Effects of intensity of milk replacer feeding during the pre-weaned period in calves on subsequent performance of dairy cows considering additional factors in later life	141
*Göring-Habenicht S., Meyer U., Liebert F., Dänicke S. – Braunschweig/Göttingen	
124. Effects of energy intake during early postnatal life of Holstein-Friesian calves on later life milk production during first lactation	142
*Wiedemann S., Kühl R., Kunz H.-J., Maccari P., Kaske M. – Kiel/Blekendorf/Hanover/Zurich	
125. Development of milk production during the colostral period and early lactation and its relation to overall lactation performance in dairy cows	143
*Kessler E., Bruckmaier R., Gross J. – Bern	
126. Validation of an automated sensor system to count and characterize the jaw movements of cows	144
*Selje-Abmann N., Lawrence P., Frey S., Meitinger S., Stöckle K., Dickhoefer U. - Stuttgart	
127. Hepatic mRNA expression of chemerin and its receptors and the transcriptional cofactor transducin beta-like-1 during late pregnancy and early lactation	145
*Aguinaga Casanas M. A., Schäff C., Hammon H. M., Röntgen M., Kuhla B., Mielenz M. – Dummerstorf	
128. Influencing factors on the abundance of rumen protozoa in two <i>in vitro</i> fermentation systems	146
*Mohr T., Abel H., *Hummel J. – Göttingen	
129. Influence of combined effect of temperature stimulation during the last days of incubation and of different protein and energy concentrations in the feed on growth performance of cockerels of different strains	147
*Halle I., Lieboldt M.-A., Henning M., Tzschentke B. – Braunschweig/Neustadt-Mariensee/Berlin	
130. Development of a rt-PCR method for quantification of <i>Kazachstania slooffiae</i> yeast species and total yeasts occurring in the porcine gut	148
*Urubschurov V., Büsing K., Janczyk P., Souffrant W.-B., Zeyner A. – Halle (Saale)/Rostock	
131. Effects of general anesthesia with ketamine and neuroleptic sedatives on plasma metabolites and hormones in pigs	149
*Das G., Vernunft A., Görs S., Kanitz E., Weitzel J., Brüßow K.-P., Metges C. C. – Dummerstorf	
Minerals	
132. Investigations on sulfur and sulfate contents in roughages and concentrates for ruminants	150
Dohm A., Wolf P., *Kamphues J. – Hanover	
133. Laboratory investigations to characterise the dietary phosphorus in compound feeds for pigs and poultry by its solubility in water and dilute HCl with and without incubation	151
Kirchner R., *Kamphues J. – Hanover	
134. Acute and subacute response of iron, zinc, copper and selenium in pigs experimentally infected with <i>Actinobacillus pleuropneumoniae</i>	152
*Humann-Ziehank E., Menzel A., Röhrig P., Schwert B., Ganter M., Hennig-Pauka I. – Hanover/Vienna	
135. Oxidative status of fattening pigs fed diets high in inorganic selenium and manganese	153
*Schwarz C., Ebner K., Wetscherek W. – Vienna	
136. Effect of milling methods, thermal treatment, and particle size of feed in layers on prececal and total tract digestibility as well as on trace element content of eggs	154
*Hafeez A., Mader A., Ruhnke I., Röhe I., Boroojeni F. G., Yousaf M. S., Männer K., Zentek J. – Berlin	
137. Negative Calcium balance in adult dogs after feeding calcium minimum requirements	155
*Schmitt S., Kienzle E., Mack J., Alexander L., Morris P., Dobenecker B. – Oberschleißheim/Waltham on the Wolds	

138. Effects of short-term reduction in alimentary zinc supply on zinc distribution in various tissue fractions of weaned piglets	156
Brugger D., Dettweiler A., Hechfellner M., *Windisch W. M. – Freising	
139. Effects of different dietary levels of phosphorus and calcium on the mitogen-induced proliferation of mesenteric lymph node lymphocytes, the intestinal microbiota and microbial activity in pigs	157
*Heyer C. M. E., Weiss E., Schmucker S., Aumiller T., Föll A., Uken K., Rodehutsord M., Hoelzle L. E., Seifert J., Stefanski V., Mosenthin R. – Stuttgart	
140. Impact of the dietary phosphorus level on growth performance and specific metabolic processes in a modern genetic line - a pilot study in piglets	158
*Büsing K., Oster M., Just F., Polley C., Vollmar B., Wolf P., Wimmers K. – Rostock/Dummerstorf	
141. Influence of high levels of dietary zinc oxide on expression of genes involved in zinc and copper metabolism in the kidney of weaned piglets	159
*Zetzsche A., Schunter N., Rieger J., Vahjen W., Zentek J., Pieper R. – Berlin	
142. Secondary alimentary hyperparathyroidism in meerkat (<i>suricata suricatta</i>)	160
*Lineva A., Novikova E., *Kienzle E., Dobenecker B. – Moscow/Oberschleißheim	
Amino acids and nitrogen	
143. Determination of the upper critical concentration of sulfur containing amino acids in diets of juvenile turbot (<i>Psetta maxima</i>)	161
*Klatt S. F., Susenbeth A. – Kiel	
144. Influence of graded dietary L-arginine (Arg) supply on growth and N balance in female chicks of four purebred layer genotypes (GT) differing in phylogeny and performance	162
*Lieboldt M.-A., Halle I., Frahm J., Schrader L., Weigend S., Preisinger R., Dänicke S. – Braunschweig/Celle/Neustadt/Mariensee/Cuxhaven	
145. Effects of glycine supplementation of low protein diets with low or high proportion of free amino acids on growth and protein utilisation in broilers	163
Siegert W., Helmbrecht A., *Rodehutsord M. – Stuttgart/Hanau	
146. Effect of dietary methionine to cystine ratio on methionine efficiency in growing meat type chicken	164
*Wecke C., Sünder A., Liebert F. – Göttingen	
147. Influence of grinding intensity on the precaecal amino acid digestibility from legumes in laying hens	165
*Nülken C., Abraham U., *Kluth H. – Halle (Saale)/Gröningen	
148. Relations between the crude protein content and the amino acid profile of organically produced field beans (<i>Vicia faba</i> L.) and field peas (<i>Pisum sativum</i> L.)	166
*Witten S., Aulrich K. – Westerau	
149. Standardized ileal amino acid digestibility in eight genotypes of triticale fed to growing pigs	167
*Strang E., Eklund M., Rosenfelder P., Sauer N., Htoo J. K., Mosenthin R. – Stuttgart/Speyer/Hanau	
150. Effect of different protein levels and sources in diets of weaned piglets on intestinal microbial composition	168
*Rist V. T. S., Weiss E., Eklund M., Sauer N., Mosenthin R. – Boenen/Stuttgart/Speyer	
151. Tissue distribution of branched-chain α-keto acid dehydrogenase activity in response to high leucine diets in weaned piglets	169
*Wessels A. G., Kluge H., Hirche F., Stangl G. I. – Halle (Saale)	
152. Effects of a varying crude protein supply on fattening performance of finishing Simmental bulls	170
*Ettle T., Obermaier A., Aichner V., Windisch W. – Poing/Freising	

153. The occurrence of gamma-amino-butyric-acid (GABA) in grass silages with different degree in proteolysis	171
*Coenen M., Scholz H., Sallmann H. P., Heimbeck W., Parys C., Eicken K. – Leipzig/Hanover/Hanau/Övelgönne	
154. Excretion of nitrogen compounds by growing goats fed diets containing different levels of lucerne hay, compound feed and produce	172
*Steinhoff-Wagner J., Gussek I., Böttger C., Hummel J., Südekum K.- H. – Bonn/Göttingen	
Transport- and epithelial physiology	
155. Permeation of short-chain fatty acids (SCFA) across the ovine reticular epithelium	173
*Rackwitz R., Gäbel G. – Leipzig	
156. Effect of dietary nitrogen and calcium on intestinal calcium absorption and on tight junction protein expression in young goats	174
*Elfers K., Marr I., Wilkens M. R., Breves G., Muscher-Banse A. S. – Hanover	
157. Effects of a ration change from TMR to pasture on rumen parameters of dairy cows	175
*Schären M., Meyer U., Dieho K., Dijkstra J., Breves G., Isselstein J., Dänicke S. – Braunschweig/ Wageningen/Hanover/Göttingen	
158. Ruminal short-chain fatty acid absorption in response to long-term SARA induction	176
*Khiaosa-ard R., Qumar M., Pourazad P., Wetzels S., Klevenhusen F., Aschenbach J.R., Zebeli Q. – Vienna/Berlin	
159. Effects of experimentally induced pancreatic exocrine insufficiency in young pigs on morphometry and function of the small intestines	177
*Möbeler A., Herrmann J., Breves G., Kamphues J. - Hanover	
160. Formula compared to sow milk feeding changes digestive physiology and microbial ecology in the small intestine of new-born piglets	178
*Pieper R., Zetzsche A., Kröger S., Vahjen W., Röhe I., Tedin L., Zentek J. - Berlin	
161. Is equine jejunal glucose transport modified by ischemia?	179
*Dengler F., Rackwitz R., Gäbel G. – Leipzig	
162. Mechanisms of Ca²⁺ and P_i transport in equine small intestines	180
*Marholt L., Muscher-Banse A., Wilkens M., Breves G., Cihak A. - Hanover	
163. Effects of individual short chain fatty acids on tight junctions of the ovine ruminal epithelium	181
*Greco G., Hagen F., Meißner S., Deiner C., Amasheh S., *Aschenbach J.R. – Berlin	
164. Effects of an acidogenic, grain-rich diet on short chain fatty acids absorption from the washed reticulorumen procedure of cows	182
*Qumar M., Pourazad P., Wetzels S., Khiaosa-ard R., Klevenhusen F., Aschenbach J.R., Zebeli Q. – Vienna/Berlin	
165. Dynamic regulation of tight junction protein localization in murine mammary gland epithelium after discontinued suckling	183
Markov A. G., Mießler K., *Amasheh S. – St. Petersburg/Berlin	
Workshop: New aspects in physiology and nutrition of sows regarding actual developments in breeding	
WS1 Genetic factors on reproductive traits in pigs	185
K. Wimmers*, E.Murani, Siriluck Ponsuksili – Dummerstorf	
WS2 Physiological aspects of lactation capacity in sows	186
G. Breves - Hanover	
WS3 Supply of energy and nitrogen in breeding sows	187
A. Susenbeth - Kiel
